

First Falcon Homecoming

No School November 11

Genevieve Humiston, Dean of Admissions and Records at Cerritos, announced the following reminder to Falcon students. Tuesday, November 11, Veteran's Day, will be a legal school holiday and classes will not be held.

This will be the second school holiday that Cerritos students have enjoyed. The first was Admissions Day in September. On November 27 and 28, students will enjoy what amounts to a four-day weekend with Thanksgiving recess. Christmas vacation will extend from December 15 to January 2.

Vacations scheduled for the Spring Semester include: Lincoln's Birthday on February 12, Washington's birthday on February 23, Spring Vacation on March 23 to March 27.

The second semester will end on June 19. The first semester ends on January 30.

Merchandising Course Offered

Cerritos College will offer a pre-Christmas merchandising course starting November 4 to help residents who desire Christmas holiday sales work.

Those who complete the four week course will receive certificates which will help them obtain Christmas employment with stores cooperating with the Cerritos merchandising program.

There will be four two-hour class meetings, according to Joe Incorvaia, coordinator of the college distributive education program. Classes will meet November 4, 6, 13, and 18 in Room 725 of the Artesia high school from 5 to 7 p.m.

Course content will include an analysis of the salesman, the store, the customer, the selling process, merchandise, and gift wrapping.

Tuition is free. Persons interested can pre-register now at the College admissions office, 11442 East Alondra, between 8 a.m. and 4 p.m. or in the Cerritos guidance office, 11442 E. Alondra, between 8 a.m. and 4 p.m. or in the Cerritos guidance office, Room 725 at the Artesia high school between 4 and 10 p.m.

A second section will run November 20, 25, December 2 and 4.

Talon Marks' "First" Edition

This issue of "Talon Marks" is the first regularly styled newspaper in Cerritos' history. For this week, in honor of homecoming, "Marks" comes to you in this form.

Prepared by the two Falcon journalism classes, some of the students that worked on the publication included Gene Bunnell, Tom Cavanaugh, Kathie Lewis, Carol Streets, Mike Moore, Jack Whyte, D. W. Miller, Dave Pierce, Marilyn Plemons, Dave Gunther, Elizabeth Shotwell, and Craig Sheff.

Money does not permit the weekly publication of a paper this size but it is hoped that school year plans of next year will permit a regular paper.

Big Week Scheduled For Cerritos

Cerritos College's first homecoming week officially got underway at the beginning of the week, but most of the major Falcon activities will be concentrated around Friday and Saturday.

Major events include a parade, football game, dance, naming and coronation of the queen, and a rally assembly.

SATURDAY BIG DAY

Saturday, November 8 will be the big day for the Falcon students. At 2:30 p.m. a parade will form at the Alondra campus. The motorcade will then take in all areas of the college district, Artesia, Bellflower, Dairy Valley, La Mirada, and Norwalk. Although no floats are planned for this year's event, the college staff is hoping that future parades will grow with the college and become a major source of interest for Cerritos students.

Cerritos' football game with Weber College of Ogden, Utah, at 8 p.m. will be one of the night's major attractions. A special part of the halftime ceremonies will include the crowning of the queen and special honors paid to the homecoming court. This will be the first announcement of which of the five coed candidates won the honor of becoming the Falcon's first homecoming royalty.

Saturday's activities will be ended with a dance at the Artesia high school cafeteria beginning at 11 p.m. The dance will end at 1 a.m. and all students and staff members are being urged to attend. As special guests of the Cerritos College student body, the football players from Weber College will attend the event.

ONE TO BE QUEEN

One of the biggest questions being asked by Falcon students is which of the five Cerritos coeds will be the homecoming queen. The five, Ann Barrett, Darlene Bitter, Priscilla Lowe, Margie Schlarman, and Sherie Van Tassel, will not know the results until the halftime of the football game. One will become queen, the other five will be princesses and serve as the royal court.

The student body has purchased a special tiara that will be worn by this year's queen and all of those that follow her in the years to come.

Which One Will Be Queen?

Five Falcon coeds will be the subject of the Cerritos student body election this week, as they select their first homecoming queen. One of the five will be crowned at the halftime of the Cerritos-Weber football game. The four remaining candidates will form Cerritos' first regal homecoming court, inaugurating another tradition for the college.

BARRETT

Competing in queen contests is not new to the only sophomore candidate, Ann Barrett. At Santa Fe where she attended high school, Ann was selected as a princess to ride on Whittier's float in the 1957 Tournament of Roses Parade. She was also Basketball Queen at Fullerton JC where she attended one semester. Brown hair, hazel eyes, 5'6" tall and 126 pounds describes this 19-year old business major who plans on going to Long Beach State after Cerritos. In her spare time, she likes to collect records and eat hamburgers. Ann was born in Monticello, Arkansas, and now lives in Norwalk. She is currently serving Cerritos as a songleader.

BITTER

Huntington Park High salutes former student, 17-year old Darlene Bitter, as one of Cerritos' Homecoming candidates. Standing 5'8" tall and weighing 126 pounds, this blue-eyed, dark-haired freshman was very active in high school in student government. She was Senior A and B Vice President, and assistant ASB Vice President. Darlene was also kept busy as commissioner of publicity and commissioner of welfare. Her future destination is Whittier College or USC where she will finish her elementary education major. Planning a teaching career, Darlene states first or second grade as her preference. Darlene's spare time is spent studying. Her favorite foods are fried chicken, french fries, and yummy chocolate cake. Huntington Park is where she makes her home. Darlene was born in Whittier.

LOWE

ASB songleader at El Rancho High last year was Priscilla Lowe, one of Cerritos' Homecoming candidates. She also served her school as Girls' League Secretary. This 18-year old stands 5'3" tall and weighs 112 pounds. She has brown hair and hazel eyes. Taking only course at Cerritos, Priscilla attends a typing class on Monday and Wednesday. During the day, she works at the Bank of America in Los Angeles. A job as an airline stewardess is included in her future plans. A native Californian, she now lives in Pico-Rivera. Pris likes to collect records and eat fried chicken.

SCHLARMAN

Blond, green-eyed, 17-year old Margie Schlarman is 5'2" tall and weighs 110 pounds. At present this Homecoming candidate is busy planning activities as AWS President at Cerritos. Margie graduated from Excelsior High School where she was chosen as a homecoming princess last year. She also served as an ASB yell leader for two years, and was head yell leader in her senior year. This freshman lists her favorite food as spaghetti and her favorite vacationing spot as Catalina Island. Born in the movie kingdom of Hollywood, Margie presently lives in Norwalk. A business major she states no definite plans for the future.

VAN TASSEL

Homecoming candidate, Sherie Van Tassel, takes minutes at the Student Council meetings as ASB Secretary at Cerritos. A business major she works during the day and attends classes at night. This 5'3" tall freshman weighs 105 pounds. Blond with blue eyes is Sherie who graduated from Anaheim High where she served on student council for two years, also the annual editor. In her spare time this 19-year old enjoys listening to Louis Prima albums. Her favorite foods are pizza and Mexican foods. Winnebago, Minnesota was where Sherie was born. Her future plans include San Jose State.

Fourteen Cerritos Students Join Alpha Gamma Sigma

Fourteen Cerritos College students earned "B" grade averages or better during the 1957-'58 school year to qualify for membership in Alpha Gamma Sigma, state honor scholastic society, according to Miss Genevieve Humiston, registrar, and Joseph Kleinerman, language instructor.

Miss Humiston and Kleinerman are also chapter Alpha Gamma Sigma advisors.

Highest scholastic achievement was attained by sophomore Robert McDaniel, 15712 Madris, Norwalk, with a perfect 4.0 straight A average. McDaniel, an Excelsior High school graduate, is the only student to maintain an A average. McDaniel, although apparently knowing almost all the answers in the classroom, is

still undecided regarding his major.

Freshman John Haraksin, 15741 Elaine, Bellflower, was second highest scholar with an A minus 3.79 grade point average.

Four Norwalk students, three from Artesia, two from Bellflower, two from Lakewood, and one from Rivera, complete the honorary list.

The rest of the Cerritos scholars who will be initiated into Alpha Gamma Sigma in November are:

Daniel Bryant, sophomore, 12158 Longworth, Norwalk, engineering major and graduate of Santa Fe Springs, with a 3.69 average.

Claudette Castillo, 20712 Pioneer, Artesia, education

major, with a 3.40 average.

Tarvin Clark, 9606 Riessel, Rivera, technical and industrial major and graduate of El Rancho high school, with a 3.25 average.

John Eugene Dexter, 12513 Anabella, Norwalk, business major, with a 3.50 average.

Juel Gregerson, 12127 East Tillbury, Artesia, art major with a 3.49 average.

Maurice Hill, 15703 1/2 Ryon, Bellflower, engineering major, with a 3.07 average.

Peter Lavery, 11563 Potter, Norwalk, history major and Excelsior high school graduate, with a 3.60 average.

Russell Peterson, 6311 East Cardale, Lakewood, engineering major with a 3.0 average.

David Pierce, 15711 Eucalypt-

Falcon Students Have Tops in 'Good Cheer'

Leading the Falcon good cheer at halftime events and all of the pep rallies are three fine activity groups. Cerritos' song leaders, cheer leaders, and the Falconettes, have been one of the inspiring morale builders for the campus.

YELL LEADERS

The four ASB yell leaders, led by Don Lawhorn, have made this a real peppy year. The group is unmistakable in their blue and white outfits. The girls can be seen in white pleated skirts with bright royal blue sweaters and a big block C. Don wears the reverse with a white sweater and blue corduroy trousers. Blue socks and white shoes complete their outfits.

Donna Noland, one of the four, is a Sophomore and a business major. She hails from Bellflower high and last year at Cerritos she was a football princess and served as AWS president. Her future plans include attending Long Beach State and becoming an airline hostess. She also stated that she's crazy about modern dance and jazz.

In her second year of yell leading is Farrie Jo Pirtle, also a Sophomore. Her major is psychology and she hopes to attend Long Beach State next year. Farrie is an Excelsior graduate and thinks football is the greatest.

Third female member of this pep group is Sue Jackson from Excelsior. Sue is majoring in Elementary Education and wants to go to Arizona State at Tempe after Cerritos. She loves to dance and claims her petpeeve is, "people" who don't yell at the games.

Don Lawhorn, the lone male of the four, is also planning on Arizona State at Tempe where he will major in accounting. Also from Excelsior, Don is a sophomore and admits dancing is one of his favorite activities.

SONG LEADERS

Making an appearance at all the football games and the rallies are the five Falcon song leaders. Headed by Chris Lindstrom, the girls appear in royal blue and white wool dresses. The name of Cerritos appears in blue across the front, the skirt is white with pleated blue insets. The sleeves also have a little blue inset. White gloves, blue socks, and blue and white shoes complete the outfits.

Ann Barret, a current homecoming candidate, hails from Santa Fe High. Song leading isn't new to Ann who led songs for two-years in high school; serving as head song leader in

her senior year. A business major, she hopes to attend Long Beach State next year.

One of the two blond song leaders is Mary Jane Rodgers. This little song leader is from Artesia High where she was Girls' League Secretary. She is also planning on Long Beach State and is majoring in elementary education. In her spare time she likes to go bowling.

Marilyn Plemon is the third member of the group. At Artesia High she served as ASB director of activities. Now Marilyn is majoring in business and hopes to find a good job after graduation. She also likes bowling as an outside pastime.

San Jose State or Long Beach State is the destination of PE major Thelma Boersma. She is from Artesia where she was Girls' League president. When she isn't leading songs or studying, Thelma likes to knit socks and attend football games.

Head song leader, Chris Lindstrom, is a sophomore and is majoring in PE. She went to Excelsior High and was their delegate to Girls' State in Sacramento. She would like to attend Santa Barbara and playing tennis is her favorite outside activity.

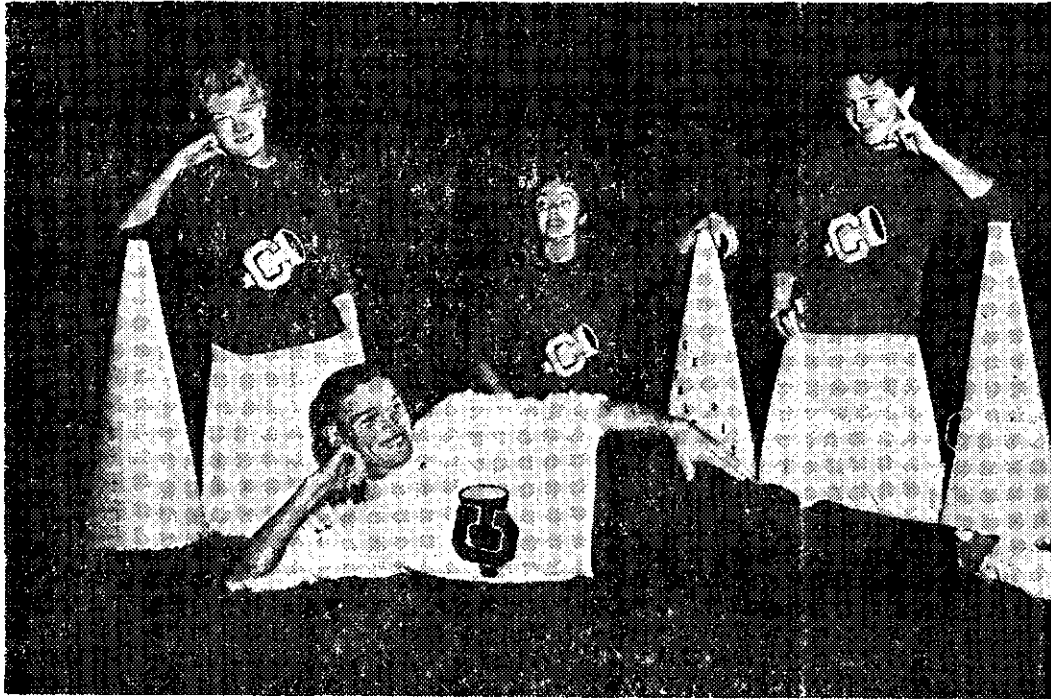

FALCONETTES

The Falconettes made their first appearance at the Cerritos-Glendale football game. Organized as a service club, the group is a precision flag team that was just organized this year. Advisor to the group is Joan Schutz, instructor in women's physical education.

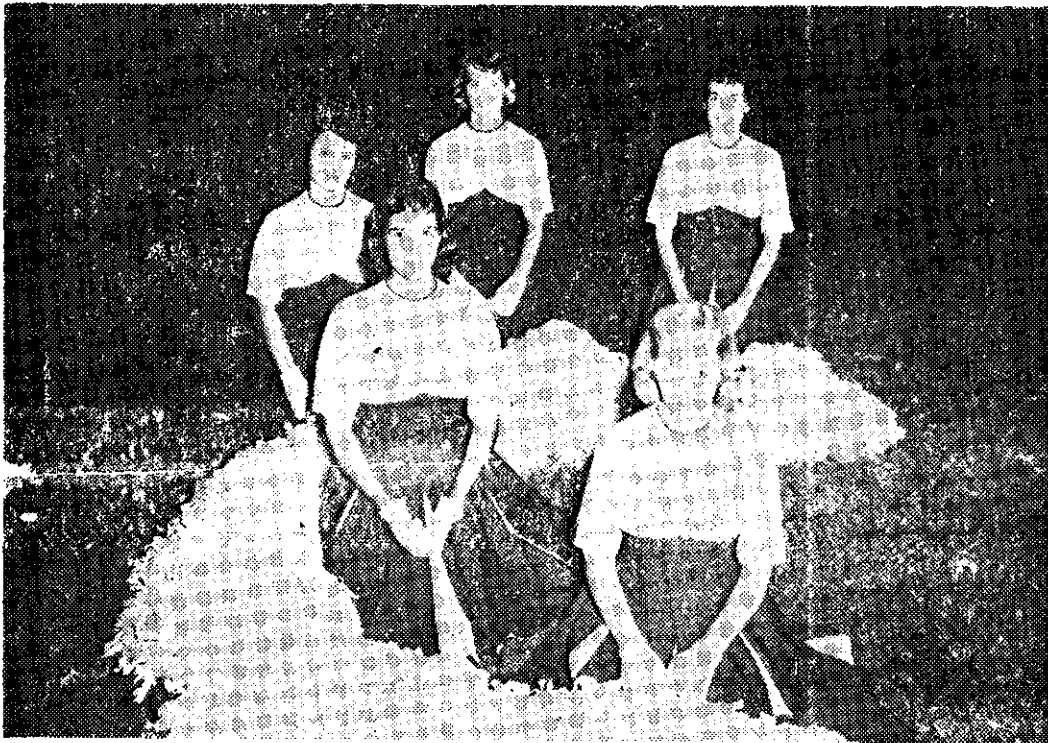

The group consists of 12 women students, Helen Larrabee, Sandy Walberg, Jennie Moreno, Bertha Gomez, Carolyn Tubbs, Sharon Cook, Iris Mareck, Joyce Bunnell, Marge Kennedy, Dorene Nunley, Elizabeth Shotwell, and Judy Zittel.

The blue and silver costumes that were chosen by the Falconettes were designed by the organization's president, Helen Larrabee. They are princess-style waist, with a stand up collar and silver inset V and a small pleated skirt. For off-field activity, the Falconettes wear blue and white capes with the Cerritos emblem on the back.

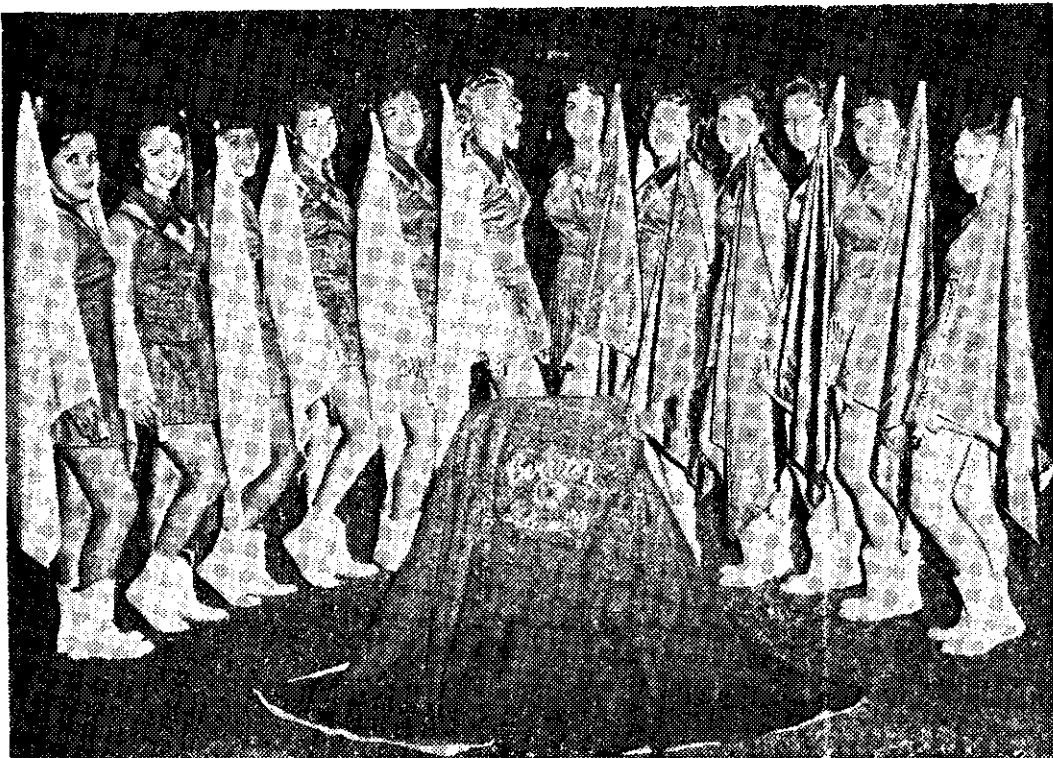

The uniforms were obtained through the cooperation of the Cerritos Bench.

Falcon yell leaders Farrie Jo Pirtle, Donna Noland, and Sue Jackson, look wistfully at Head Yell Leader Don Lawhorn. Rated a top notch group in the junior college ranks, the yell team is as boisterous about the Cerritos grid team among themselves as they are leading the cheers.

This cute quintet of Cerritos song leaders includes Mary Jane Rodgers, Ann Barrett, Marilyn Plemon, Chris Lindstrom and Thelma Boersma. Ann, second from the left, is one of the Falcon homecoming Queen candidates. The group makes appearances at all of the college's athletic contests and pep rallies.

Newest group to appear on the campus is the Falconettes. Organized as a service club under Instructor Joan Schutz, the precision flag team has already added new laurels to Cerritos. From left to right, the girls are Bertha Gomez, Joyce Bunnell, Jennie Moreno, Iris Marek, Judy Zittel, Dorene Nunley, Sandy Walberg, Marge Kennedy, Helen Larrabee, Caroline Tubbs, Sharon Cook, and Betty Shotwell.

By GENE BUNNELL

A crushing record-breaking offense and a team called power will go into Saturday night's game against the Weber College Wildcats of Utah. Cerritos' stunning display of power over the past few weeks may get a sheer test of stubbornness against the Weber squad. The game will be played at Excelsior Memorial stadium as part of the Homecoming Week activities at the Falcon campus. Kickoff will be at 8 p.m.

Weber will bring a talented group of footballers to California for this game, the result of a building program that has made the Utah team a feared eleven in the Rocky Mountains.

Wildcat Coach Wally Nalder, reported that, "We are strong in every place we were weak last year. Our entire line is vastly improved and has advanced noticeably in each game." Nalder also expressed satisfaction with his "small, but fast-breaking" halfbacks.

Against Weber will be one of the nation's most awesome display of offensive power in many years. Cerritos has ground out a stunning offense that in its first four games piled up a fantastic 383.8 yards per game running and passing. Only a single one-point loss in the season opener has kept the Falcons from marching to the top of the nation's two-year schools.

Cerritos' Head Coach Earl Klapstein has every right to be pleased with the overall performance of his team. Klapstein readily admits that, "This is one of the finest junior college teams I have ever seen."

The 1958 team has been no Cinderella squad at all, which was the story of the rags-to-riches campaign of '57. The Falcon team this year has just burst out in a rage of scores and has seen records broken in almost every game.

The brightest spot of the

offensive picture has been Halfback Bob Bagwell. In the season's first four games he had scored 50 points and gained 462 yards for a 10.04 average. Bagwell is running very close to the record set by All-American JC star Ray Adermann for Cerritos last year.

Odds-makers have tabbed the Falcons as an eight-point favorite over Weber, mainly by virtue of the stinging 34-7 victory over the Wildcats last year. It was Weber that became the first victim of Cerritos' surprising play last year. Dave Godwin, the back who

ing the intersectional tilt, Pasadena, Pierce, and Los Angeles follow in that order. A loss to any of them could make a disaster of what has been a magnificent year. Both the Falcon and Los Angeles City College are tied for the WSC lead.

Although there are still a number of jaysee teams left in the unbeaten ranks in the state, the crucial series of games are still to come. The Falcons, by remaining as one of the state's better clubs, have a clear shot at one of many bowl games if they can maintain the torrid pace set by the entire state picture.

Klapstein is not overly optimistic and stated flatly, "We have to play each game as it comes and be prepared for anything. We know that we are the team to beat and everyone is pointing for us, all that we are going to have to do is do our job well. Everything will take care of itself after that."

One thing is for certain. This Saturday night marks the two-thirds point of the season. A victory could boost the Falcons to heights of great glory; a defeat could be a real tragedy.

EARL KLAPSTEIN

Falcon head coach has posted two fine years as Cerritos chief. May take team this year to an unprecedented two straight bowl games.

scored the first Falcon touchdown in history and opened the floodgates against Weber in '57, will be a starter in the game.

The Falcons have their toughest road to hoe from this point of the season on. With a possible bowl game at stake and the long march to a potential Western State Conference championship, Cerritos will enter a final foursome of games. Weber marks the first. Follow-

STARTERS

When the Cerritos College football team takes the field against Weber this Saturday night, six of the tentative starting lineup will include sophomores. Only one letterman will be in the backfield.

Coach Earl Klapstein indicated that there might be a change or two, but felt that he would go with his announced team. Lettermen include Ends John Frongillo and Bob Lane, Tackles Jesse Wilson and Dennis Emken, Center Larry Larison, and Halfback Dave Godwin. Both of the guard spots will go to freshmen, Phil Oram and Hal Gray. The backfield will consist of three first-year men, Quarterback Bill Nelsen, Halfback Bob Bagwell, and Fullback Bob Lyons.

Klapstein announced that the captains for the game would be Gary Lossette, Tarvin Clark and Jake Garcia Lossette, an honorary captain was injured in the Falcon's first grid game and has been out for the season. Last year he was one of the sparkplugs of a great Cinderella story.

The starting Cerritos line will average 212.3 pounds per man and will take one of the nation's great junior college defensive records into the game. The Falcon's starting backfield, on the other hand, will go into the fray with one of the most stunning offensive records of the 1958 season. The total offense has approached nearly 400 yards per game.

A photograph of the model of Cerritos College's campus to be is a view taken from the corner of Alondra and Studebaker Road (lower center) and looks southeast across the grounds. Construction that is currently going on, is centered in the area to the right of the photograph and includes the business wing, science-lecture building, and the social science building. The completed field house is in the far upper corner of the campus.

Looking slightly northeast from Studebaker Road, the college campus shows its modern design in this closeup. The building in the lower center is the lecture hall, one of the most advanced designs ever established on a school campus. The two-story structure at the left-center is the social science building and will be the only double-structured unit on the 97-acre grounds. The Y-shaped building will eventually be the auditorium area and will house music, drama, and television.

Looking southwest at the college model, the picture shows the men and women's shower and locker room at the right-center which is under construction. At the left and upper right are the dual gymnasiums, one for the women students, the other for the men and athletic use. The college's swimming pools are in the center of the plan. Just below the Y, is the student union building, which will be completed by the next school year.

Student Reports on What Bonds Mean

By TOM CAVANAUGH

Residents of the Cerritos College District overwhelmingly approved the Cerritos Bond issue by a margin of 80% yes—20% no.

Dr. Ralph Burnight, Cerritos College president, made the following statement, "We wish to express our appreciation to every citizen who indicated his confidence in us, and who recognized the importance of education through his vote in favor of completing the campus at Cerritos College. In return we assure every member of our community that we will be good stewards of their trust. We will continue to prepare for our growing community with an adequate school campus and to provide an educational program which is practical and rewarding to the individual and to our community."

TO THE STUDENTS:

The Bond passage means the assured completion of the library, sciences, industry and technology, arts and crafts, music drama and TV buildings.

community college provides two-year and other types of specialized training.

TO THE CITIZENS:

The bond passage does not effect the present tax rate. It does extend the present bond retirement rate an additional five years—from 1978 to 1983. Instead of imposing the cost on only the present residents, by extending the bonds, future residents moving into the area will also share in the cost of the college. This creates a broader rather than a heavier individual tax base.

Economists have established that we are in a continual spiraling inflation, and by 1965 construction costs are expected to be doubled. By building now, preparations are made for our growing enrollment, lower construction cost, and a repayment with cheaper dollars.

There are many adult classes that provide assistance in your everyday work, and the college also entertains any suggestions for specialized classes, if requested by a minimum number of interested residents.

TO THE COMMUNITY:

The bond passage provides a more valuable district through the natural course of inflation, new businesses, and improvements which create a higher assessed valuation of property. Studies indicate that colleges draw more industries into the area, in turn creating a broader tax base.

The college will provide cultural and community enrichment through its adult classes, forums, plays, music festivals,

DR. RALPH BURNIGHT
President of the College

It will benefit our present elementary and intermediate school students who reside in the college area. High school students can save costly tuition and other expenses by living at home and completing their first two years of college in the local community and gaining full accredited training. Also, these students will readily adjust to college better than when they are thrust suddenly into the overwhelming college environment.

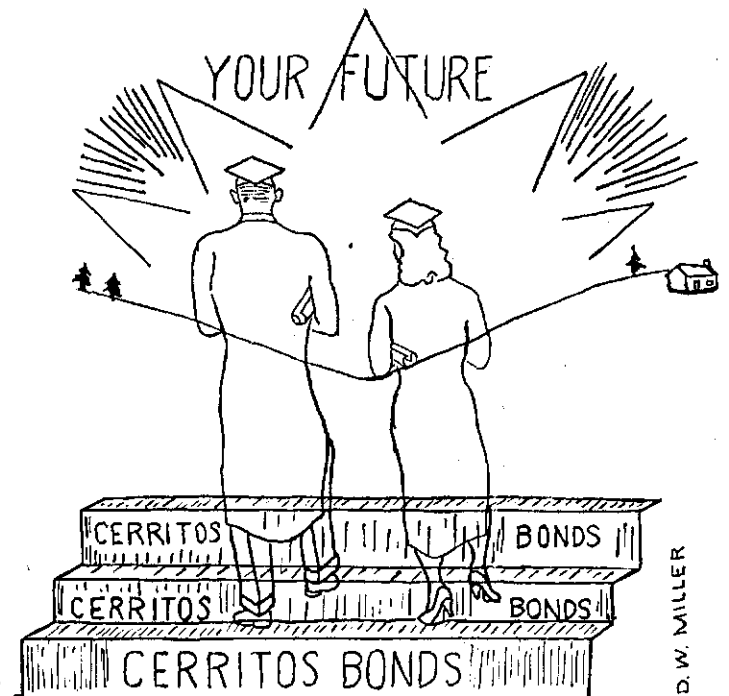

More students are attending college today than ever before. It is commonly known that practically all jobs continually require skill or specialized training of some type. There is and will continue to be less demand for unskilled labor. The

DR. ROBERT ROCKWELL
Director of the College

act shows and other community programs.

The college is also responsible to its community in providing recreational activities and helping stimulate pride and entertainment through its inter-collegiate programs.

D. W. MILLER
