STREGLING JOURNALISTS--Pictured is the new Talon Marks staff. They are: (Upper row) Pat Hale, Thom Lecoq, Ed Miller, Mike Barr, HenrSamuels, Louie Albidrez, Jerry Johnson, Rick Haines and Michael Cornner, advisor (Lower row) Joe Villegas, Joe Roberts, Bonnie

### Tilon Marks Has New Look This Fall As Journalists Report Campus Events

Buing around the office of Talon Man, the new staff began another semter's struggle to bring all the new:sports plus a few added features and some pertinent editorials to evenne on campus.

Thmay have a different approach this emester mostly due to a new advir, Michael Cornner, who began his firstear with the paper this summer. Correr graduated from Cal State Long Beat and Northwestern University, As a gridate student he worked for two radistations in Washington, D.C., one in Illo's and another in Texas.

Coner was last employed as advisor to Rling Hills High School's Titan

#### Clus Woo New Members At naual Club Booth Day

Fcy-two clubs and organizations werout in full force Wednesday, as they/ied for new members on Club BootDay.

Ch Booth Day, is an annual event at Cerros which gives students the oppcunity to look over the clubs on camis. Each club had active members on Ind in the booths to inform the studits about their clubs.

Paicipating clubs were: Curricular club: Edelwiess, Gamma Gamma Sign. Home Economics, Kappa Theta Phi, ambda Alpha Epsilon, Phi Beta Landa, Prosthetics and Orthotics, Rad: Electronics, Society for the Advicement of Management, Tau Phi, Sociy of Manufacturing Engineers, and au Rho Beta; Service Clubs-AWS. Circ K, and Sinawik; Panhellenic ClubAlpha Phi Beta, Gamma Rho Delt Delta Phi Omega, Lambda Phi Sign, Phi Alpha Gamma, Phi Kappa Zetaligma Phi, Theta Phi, and Upsilon Omion; and Special Interest Clubs-Airle Stewardess Club, Arab Club, Big C, Cnpus Crusade for Christ, College Recation Association, International Club LDS, Omnibus Society, SIMS, Studits for Progress Through Edution, Soccer Club, Veterans Club, Homeoming, Financial Aids, YAF, and newspaper in Southern California.

semester was Bob Hardin. This will be editor. Louie Albidrez, active in many his fourth semester with TM but first youth programs, was the Student Body time as executive editor. Previously he president of Norwalk High School. has displayed his talent as cartoonist, editor. Hardin is also a member of Beta Phi Gamma.

In her fourth semester as managing Cerritos. editor, Bonnie Schleinitz has returned as the "Girl Friday" around the office. She is a member of Beta Phi Gamma and is struggling for an AA in communications.

Returning for their second semester as editors will be Ben Dicksion as associate editor and Pat Hale as sports editor. Majoring in journalism, Dicksion will be presenting many of his views on the editorial section of TM. Thom Lecoq will be TM's new Feature Editor.

In the fall of '69 Hale was on the staff as Sports Editor with an interrupted semester at Cerritos, is back again this fall to display his talent as Sports Editor once again.

Another familiar face around the office will be Joe Villegas, photo editor, who has been on the staff for three semesters. This will be his second semester as photo editor.

His first semester on the staff, he a first place in news photography for an interesting photograph of John Wayne at the Beta Phi Gamma convention. This was the first time any TM Photographer had ever taken a first in this field.

Three photographers working with Villegas for the third semester for each will be Joe Roberts, majoring in journalism; Ed Miller, majoring in photography and Rick Haines also majoring in photography.

Mainly writing sports, Michael Barr will be spending his second semester with TM. He is also Vice-President of Circle K, service club of the year.

TM has the fortune of having four new reporters added to the staff. Verletta Kelsheimer attended Excelsior High School and majoring in speech. Henry Samuels seemed to show a deep interest in writing editorials but will also try his hand at writing a few news stories and features. Jerry Johnson was on the

### **Baseball Field Site** Of Bench Barbeque

All Cerritos College students are invited to attend the college's annual Bench-ASCC Bench Barbeque, Saturday at the baseball field bleacher area, where an extimated 1,700 people will be

The event is open to the general public with tickets being sold for \$1.25 to the public and 50 cents to students.

The purpose of the barbeque is to promote interest in the Cerritos College Football Program, to provide an event availabe to the community, to provide a source of income for the ASCC and the Bench and to provide an event that will allow a joint cooperative effort for the Bench and the ASCC

Each year the barbeque has been attended by a greater number of people. This year they expect a total of 1,700 students and community residents. This means that their planning and

preparations must be through. For further information contact the Office of Student Affairs, ext. 246.

### Students To Receive Scholastic Aid Through Cerritos Tutoring Program

Cerritos students desiring the service. directed by Richard Juliano, Cerritos, work for free. instructor. It is attempting to keep students in school who need scholastic

The program was put into its present Dean of Academic Affairs. With aid from former ASCC President Jim Howard and The Student Senate, Juliano secured approval of the program from the Office of Academic Affairs and the Cerritos College Board of Trustees.

The Board appropriated \$4,000 for the pilot program which has proved to be an extremely successful undertaking and resulted in its continuation.

There has been an extremely critical need for such a program which is evident in the fact that 2,000 Cerritos students are on scholastic probation, and that the number of withdrawals from individual classes last fall reached 11,351 or 26.7 percent of the total enrolled. The number of complete dropouts reached 18.3 per cent of those enrolled.

Before the establishment of this program, for Cerritos students, the plight of these people was all but forgotten. According to Juliano these students 'now have a place to turn for help.

The program is provided at no cost for the student who wishes the aid. He is welcome to use the aid for as long as he feels he has a need for it, but he also must not abuse the privilege. Students will not be penalized if they fail to show any specific scholastic improvements.

Juliano emphasizes that the program is not a remedial course. It is a \* Jostie aid." There is ho "special help" stigma attached to the program. only persons who know that someone is being helped is that person, the tutor, and Juliano himself.

Tutors in the program are required to have at least a 2.7 overall GPA and at least a 3.00 in their major area of study. In addition to this these students usually must have a recommendation from one of their instructors.

Prerequisites which tutors must have, above all else, are the proper attitude and interest in wanting to help another person improve himself. Coupled with this must be an ability to communicate.

### Theatre Arts Stages Final Try-Outs for "The Egg"

Lee Korf and the theatre arts department announce final try-outs will be open to all ASCC members, for "The Egg" on Monday, Sept. 28 in BC 31 from 2-4:30 p.m.

The play calls for 18 male and 15 female speaking parts with various nonspeaking parts. In order to present the finest possible production of "The Egg" casting will be of utmost consideration.

Korf will be looking for a student to play the part of Emile Magus, a modest young man that is trying to analyze the system and the methods of getting into the system. Although first impressions upon hearing the lines may lead the listener to believe that "The Egg" is strictly comedy it may become disturbing that what was first comedy soon becomes satire and finally ends in a very surprising way.

Anyone that is willing to offer their time to put their tale its to work is urged

#### **Record Enrollment** For Fall Semester

For the 14th Fall Semester, Cerritos College opened its doors to 15,608 students, the largest enrollment since the beginning of Cerritos Junior College, according to Edward M. Wagner, dean of admissions.

With 5,317 students attending class full time this year, the enrollment is up 9.3 per cent. Part time enrollment is up 21.8 per cent with 10,291 students. Total enrollment is up 17.2 per cent.

One thousand six hundred courses are offered this year, three hundred more than last year. More and more students are coming to the junior colleges because the state colleges are filled.

High school graduates are now attending the junior colleges first because there is no tuition to pay and it is closer to home. Unemployment rates are at 6 per cent so many are going back to school for retraining or for new

The Cerritos College Tutorial Services For the fine work that they do, the written forms in the Student Affairs Program is now ready to once again program's tutors receive a \$2.50 per Office, in Room 110 of the library, or begin its scholastic aid, free of cost, to hour payment. The fine character of they should go directly to Mr. Juliano's these tutors becomes evident in that Office "C" in the Physical Education The Tutorial Services Program is some have even volunteered to do the

Before the sessions begin the tutor will contact the person receiving the aid, and meetings will be arranged which will be of the most convenience for both form under the directorship of Juliano of them. The tutoring sessions take who took action at the request of Dr. place two or three times a week and last Harlan Stamm, the former Cerritos a four to six hour total. They are held in the Cerritos library during the hours that it is open.

If any type of problems arise between those persons taking part in the sessions, they are free to express them to Juliano. He will then make the necessary efforts to resolve the problems. Those persons taking part need never feel obliged to continue under any unacceptable circumstances.

The program has proved itself to be extremely successful in spite of its relatively short existance of barely two months. On the average those who received aid improved a full grade in the areas which they received help in.

A student commented that he was greatly indebted to the program that helped me graduate. Your program is excellent." Another said, "Thanks to this program, I will pass Spanish 2." One student captured the essence of what the program is trying to do by saying that, "It is good to know you can get help."

Those who desire to either help in or to be helped by the program should pick up

RICHARD JULIANO ... Head of Tutoring Program

### "How Russian's Live" Is First Topic of Lecture Film Series

Clay Francisco will be the first Dick Reddy and his film, "Mark Twain lecturer to report in the Cerritos Film in Switzerland," April 15. Lecture Series with a film 'How the Tickets for the series of six films will Russians are Living" starting on be \$2.50 for adults and \$1.25 for students Thursday, Oct. 1, 8 p.m. in the Student who are not full-time. Full-time Cerritos Center.

western journalists travelers who was allowed to visit the little known towns and villages of Russia.

Visiting many out-of-the-way spots on his 10,000 mile journey by car and plane across Russia, Francisco managed to record much of the experiences on film.

He found new affluence among the Russians, along with growing cynicism about their controlled society. He shows evidence of government recognition of Russia's problems, and the changes that are being made, as well as towns and villages that have changed little in hundreds of years.

To anyone who wants to understand the changing scene in the world's largest nation, this lecture report will be of vital

Other films and their producersnarrators in the Thursday night series are Bettina Shaw and her film, "South America," Nov. 5; John Goddard and his credit. film, "African Wonderland," Dec. 3; 14; Colonel Craig and his film,

students will be admitted free. The Francisco is one of the selected series is open for viewing to the public. Season tickets are available at the

Student Center Box Office. This opportunity for the perfect family

entertainment as well as for the students have been made available to the public as a part of the program set up by the Office of Community Services.

#### Last Chance to Submit Senate Election Petitions

Tomorrow is the last day to obtain and complete petitions to run for the office of student Senate. Petitions must have 20 signatures of full-time students along with each student's ASCC sticker number.

There will be 30 Senate seats available, 12 freshman seats and 22 sophomore seats. To qualify for a sophomore seat a student must have completed 30 or more units of college

Elections will be held Tuesday Willis Butler and his film, Turkey, Jan. evening and Wednesday day and evening. Voting is open to all students, 'Incomparable Greece," Feb. 11; and full or part-time, with an ASCC card.

ROLLERS AND PINS--Diane DeVore gets her hair teased and pinned by Mary Ja Becker at the Kappa Theta Phi Booth, during Wednesday's Club Booth Day, while Dee Lybarger prepares

### **New Art Display Revealed at First Gallery Exhibit**

Debuting Monday was the annual Southern California Invitational for the crafts exhibition in the Art Gallery continuing through Oct. 11: Works of a 12th artist have been added to the original exhibition.

Frank Cummings of Fullerton will be the 12th artist to be represented in the show with his display of wood and jewelry crafts. Also included in the exhibition will be works crafted of metal, textiles, glass and leather.

Other artists whose works will be shown are John Myquist of Long Beach and Sam Maloof of Alta Loma, works in wood; Al Pine of Seal Beach and Lynda Watson of Long Beach, works in metal; Martha Underwood of Claremont, Dorte Lopez of Sunset Beach and James Bassler of Venice, works in Textiles; Jane Marquis of Claremont and Roger Darricarrere of San Fernando, works in glass and Jack and Karen Weirauch of

Hermosa Beach, works in leather. Admission is free for the exhibition and the gallery hours are from 12:30 to 4 p.m. and from 6 to 9 p.m. Mondays through Thursdays and from 12:30 to 4 p.m. on Fridays and Sundays.

Upcoming for this year will be seven additional major exhibitions for the viewing pleasure of the students as well as the public.

### Attion Required Soon Fa Pollution Solution

**Executive Editor** 

Wi the all talk and no action attitude toward the pollution problem, things seem to beetting worse than better. If it continues at this present rate, what will it be like by thturn of the century?

Les take a time trip to the year 2000 A.D., pick up a paper and find out: L.A. Bound

Tholace is Los Angeles...

Yolook up at the sky and all you see is a mass of bright lights surrounded by a

Puled, you ask around and learn that the city is completely enclosed by a dome to ke the poisonous atmosphere outside.

Yesee a newspaper stand, so you try to buy one, but the machine will only take a typef credit card, because money is now obsolete. There's one on the ground thou, so you pick it up and read.

Yore glancing through it and a headline catches your eye. It says something aboun evacuation of New York City. You read the story.

"IS ANGELES, CALIF. — Today marks the twentieth anniversary of the Great New/ork City Evacuation, when on September 25, 1980 the giant Megalopolis becae uninhabitable for human life.

"Ithat year, air and water pollutants were responsible for the deaths of an estinted 3.5 million persons and more than seven million were being treated for series lung ailments in the city alone. All were directly attributed to the pollution. "Cs, factories and all fuel driven machinery were shut down. Even cigarette

smohg was banned to try and alleviate the situation. City Dome Started "Aome for the entire city was started in August, but the air pollution was too dens: o allow people to stay, and there wan't enough fresh water available for a city

half e size of New York. The President of the United States declared it adisaster "Itook the army two weeks to evacuate what was left of New York City's 14

milli inhabitants, until the dome was completed. "To year is now 2000 A.D. and with the dome half-way completed, New York is

Much Disbelief Yostand there not believing what you have read, so you read it again. A look of shocand terror comes to your face as you realize it is very real.

Yobegin to think about all the time wasted discussing pollution instead of finding workle plans to prevent this ugly future, marred by man's stupidity.

Yoreturn to 1970 and find that it's still not too late to do something. It'ip to you and me to find ways to solve this problem, lest we never see the sun

### **Mass Media Needs** No Regulation by Gov't

still afeless mass of superstructures in a thick brown haze."

hen any mass media, particularly the press, attempts to reach an audience of any gnificant proportions there will virtually always arise the question: Who decis what to print? It is a question which has appeared continually since man's

day's responsible American journalists are guided by principles developed as a rest of relatively recent history.

Te first news systems in this nation's history began under severe restrictions by ahoritarian rule. When the nation first became democratic, the press took on the de of "watchdog" over the government. It searched for dishonesty, incopetence and tyranny. But the right of the public to know what was taking place tend to override everything else as it spread into a broad coverage of human

eyen.

Athout any restrictions the press was capable of riding "recklessly over human right". As an historian put it: "...the mass media in this country have spent two centres trying to be free, and only a few decades trying to be responsible."

Right to Privacy Defended Faed writer, William Faulkner, commented during the early 20th century, when

the accept of responsible journalism was coming of age, that unless a person has "comitted a crime or run for public office, his private life was his own." Faulkner felt at an individual had not only the "right to defend his privacy," but that the publ had the duty to also do the same. His reason was that "one man's liberty must stop: exactly the point where the next ones begin."

Thmodern day press, with its American Society of Newspaper Editors (ASNE), has rned to a system of voluntary self-regulation. Under this system the media is able) maintain responsibility and credibility as well as preserving its publishing freems. The guidelines provided by this are cautionary and not mandatory.

though in recent years the press has come under criticism, such as that by the Warn Commission after President Kennedy's assassination and more recently that? Vice-President Spiro Agnew, the ASNE still maintains that, "The discretion of theditor as to what is news must not be chained by prior restraint."

Not Without Legal Restraints newspaper is not completely without legal restraints. It is subject to all laws the pple of the nation live under, but those laws are not aimed specifically at the

'e ASNE allows for this by recognizing the sensitivity of the judicial process. It accates cooperation with the bench on a voluntary basis in order to preserve fair dicial proceedings.

toperation in this area does exist as evidenced by Washington, D.C. United State District Court of Appeals Judge J.S. Wright's comments. He says he thinks "thait is important that news sources are available to the press, and the press mak its own judgment as to what it is going to publish."

-LOUIS ALBIDREZ

### **Coming Down**

Flyg into Los Angeles on a clear houses and public buildings. nights a real light show. Spread out beforthe passengers is an array of red, yello, green and white pinpricks of lightthat stretch from horizon to

horiz. Theights cascade into the valleys of the Hlywood hills and climb evenly throw the "wilderness" of Whittier, They vinkle and they glare; they move alongstationary rows of light. They reveain surrealistic splendor roads, Pacific Ocean.

Dark patches seem to leap from the sea of brightness, ominous in their questionable identity. In the north is the San Fernando

Valley. In the south is Santa Ana and Orange County. All blend and mingle with the lights of Los Angeles. No boundaries are perceivable; no end to the lights, north, south or east. To the west is the great blackness of the

### **Eco Corner**

Dur Water: Why is it that we have very few people in the U.S. who are tined in water quality management? In comparison with this field, the brary of Congress has twice as many personnel supporting its operation; al how many people did it take to put a man on the moon? Is this, at least jrtly, why the water supplies of some 84 U.S. cities were rated ostandard this year?

Secretary of the Interior Walter Hickel recently recommended to the Ipartment of Justice that eight industrial firms be prosecuted under the 19 Refuse Act (think of it...1899!) for dumping mercury into the waters of

And California now leads the nation in having destroyed 67 percent of its nural estuarine (a water passage where the tide meets a river current)

(r Air: In Tokyo, more than 8,000 people were treated in hospitals for sog-induced illness during a five-day period in July. New York City's air ality falls into the official "unhealthy" category one-third of the year. Ith cities experimentally banned autos from their streets for brief riods this summer; the smog levels plummeted dramatically.

Aeanwhile, Los Angeles Country lost more than \$2.3 million in crops tough smog damage last year.

### FACE THE FUTURE

**EDITORIAL** 

### **Educators Must Help** Close Information Gap.

requesting that Norwalk's Liberator be included in the periodical section of the

The Liberator is a newspaper licensed in Norwalk. It is a community newspaper various problems. and is therefore relevant to Cerritos students.

So the formal requests then move up through the bureaucratic chain of command: from the instructor to the department head, to the Division Affairs, to the Vice-President of Instruction.

Liberator spokesmen say that they expect opposition from top administrators. However, word has it that teachers in the social sciences willhave their requests cubbyholed by Division Chairman Dr. Donald Singer.

In a telephone interview. Dr. Singer stated that no request has actually crossed his desk and that until it does, he will make no comment on what his decision shall be.

#### Important Decisions Avoided

decisions. And a decision on the out of the fear of losing a job, then will Liberator will apparently be an important decision. But until that decision is reached we may expect their jobs. administrators not to comment on, or even think very much about any problems of weight. This is unfortunate.

Too often collegiate leaders will not education is more than learning facts deserve it. Then will the change come. and being able to repeat them whenever

Various instructors on campus are asked; but that education is also an exchange, a sorting out of ideas where we teach our beliefs to others, they teach theirs to us and through this This is not an unreasonable request. exchange of thought we might together come up with the best solutions for

A faculty member or an administrator, therefore, only deserves the title of educator when he is willing to banter ideas around to determine how sound they are. This requires forming and stating an opinion, measuring the Chairman, to the Dean of Academic reaction and feedback and evaluating the opinion for truth and practicality.

Several Important Factors

There are therefore, several important factors to putting the Liberator in the library. Should a student be allowed access to information in his (ideal) search for truth? Should person be allowed total responsibility for determing what is relevant to another person's education? Should this person continue to be allowed this responsibility even if he refuses to use it unless pressed?

When administrators learn that students will no longer accept Few people like making important irresponsible decisions, decisions made administrators have to begin acting responsibly. Or they actually will lose

Administrators are being paid high salaries because it is assumed that they have enough education to enable them to make equitable decisions. The public risk sticking their necks out for any will not long continue to pay high important reason. This undermines the salaries to persons who will merely whole theory of education: that accept the money and do nothing to -BEN DICKSION

### Student Poll Reveals Parking Hassle Here at Cerritos

Talon Marks reporter Henry Samuels become better acquainted, says Rita garnering student impressions of Cerritos from various people about the campus. The question was "What would you like to see added, deleted, continued or expanded at Cerritos?" These are a few of the responses.

More boys and less girls, suggests 18year-old Cyndi Ellis, a police science major. She also would like more activities on campus such as "sports where the girls play against the guys" other than in the gym classes.

Parking can be a problem. Some classes are too large (up to 70-80 students), says Mike Carranza, a Spanish major 23 years old. He would also like more publicity as to the activities about the campus.

We need a better bookstore and more sophisticated students, says Transito Baca, a 17-year-old freshman. He also feels that the campus has inadequate facilities to promote free speech. More sports at night so people can

HAYGOOD'S HERESIES

WALK THE STREETS

conducted an opinion poll this week, Hecker, 19-year-old legal secretary major. She would also like to see more informed people helping out during registration. And the cafeteria needs ash

> Deborah Smith would like some rules changed. She can't understand why she can't take more than six units, despite the fact that she lives in this district, but her parents don't. Deborah is 19 and legal secretary is her major.

More parking spaces, says Doug Roy, a pre-dental major.

I would like more concerts during the noontime breaks, such as jazz, etc. I also think we should have smaller classes for effectiveness. Henry Rnutsen, a 19-yearold freshman, continues, saying that he believes "they should have used a better layout on parking."

places to rest.

## **Needless Fear Affects Educational Standards**

during the last few years has affected the quality of education here at Cerritos.

Board members elected by a hostile electorate are leery of requests of a controversial nature. Administrators, aware of pressures from the board, apply restraints to instructors and students. Don't rock the boat by being critical or

Faculty, aware that administrators are watching, avoid saying or teaching things which might keep them from tenure or sabatical leave.

Student organizations and clubs toe the mark so they can stay on campus

This all smacks of situation comedy until you remember that it is the individual student who suffers by being deprived of the best his school can offer him.

Learning to be critical, to question authority, to avoid acting out of fear are all prime goals of education. Trying to learn them when faculty and administration are fearful is difficult, but the goals are still desirable.

To accomplish them, each group will have to change their behavior.

RECOMMITMENT TO STUDENT NEEDS

Board members will have to recommit themselves to student needs rather than worrying about the next election. They will have to listen to student requests without the prejudice induced by election fears. Compromise is probably better than blank refusal when a request is made which is designed to probe the willingness of the board to serve the student's needs.

Confrontation needs two sides to play. Unfortunately, each side loses in a confrontation. The students lose their right to petition effectively the authority of board. The board loses the respect of the students and faculty they should serve.

Both become ludicrous pawns in the power play of the two sides.

Polarization, radicalization are the results of this power struggle. Moderation becomes impossible because each pole must flercely defend its honor and dignity. All the while losing both.

Faculty and administration could improve the quality of education and teaching somewhat if they could avoid working at cross purposes. Teachers should be buffered from the wrath of the board and electorate by the administration. Teachers are the second most important people in any school, and they should have the freedom to teach what their classes require.

We have all had classes with teachers who were afraid to add a pertinent point to a discussion, even a vital point on occasion, because they didn't want to risk an administrative reprisal.

FEAR COMES FROM PUBLIC

Remember that the fear comes ultimately from the public the schools serve. People who whisper, "Communist", whenever someone criticizes school policy. People who say, "Conspiracy", when three or four students petition an unresponsive administration, People who scream, "Kill the lousy bums", when the board is confronted by a small group of radicalized students.

People who, in a recent CBS survey, voted to remove most of the guarantees of the

Bill of Rights and Constitution so "order" can be maintained. People whose experience doesn't include college, and people who ultimately have

no real stake in Cerritos College. The problems which have beset Cerritos in the past have not been solved yet. They should be heard with tolerance for the impatience of the petitioner, and moderation

in the actions of the administration. Moderation and tolerance will go a long way toward improving campus life. Every faction must practice it in order that real progress in academic freedom and responsibility may be made here.

—Thom Lecoq

## **Active Chicanos Still** Insignificant Minority

In East Los Angeles, last month, between the flying rocks and bottles, shouts of "Vive la Raza" and "kill the Gringo Pigs" were cried by the rioting Chicanos as they demolished Whittier Blvd. in angry protest.

They were protesting the miserable living conditions in which most of them live and the role of the Mexican - American in the Vietnam war.

Some of them were expressing their hatred and disgust for society in the only way they knew how, through violence.

Yet at Cerritos, there is a way the Chicano or any other minority group can express their opinions and at the same time help lift themselves and others out of their poverty. This organization is called Students for Progress Through Education, Aids Minority Groups

SPTE organization that aids minority groups, in fact anyone who needs help either financially or scholastically, with a tutoring program to aid those students who are in jeopardy of dropping out of college whatever the cause. It also has a financial aids program where the club will give money to those students who cannot afford to go to

This organization expressed extreme interest in the Chicano movement to the extent of placing a banner notice on the Student Center, reading "Chicano Meeting-11 a. m., Thursday in AC-71."

But apparently the members of this so-called Chicano movement on campus felt indifferent toward helping themselves or others by the minute "crowd" that overflowed 13 chairs at the meeting.

It was thought that given the chance to express and help themselves through an organization such as this, they would be concerned enough to attend.

But from all indications, the only concerned people in this movement on campus, are the 13 who attended and listened to what this club had to offer. Chicano's Indifferent

It would seem that these other alleged concerned Mexican - Americans either don't care whether they raise themselves and their people socially and economically or they're just too lazy to get off their chair-warmers to do something about it.

There is no place in this society for violence, where change and help can come through peaceful means, but in ignoring these means they're just asking for the rocks and bottles to fly.

- Bob Hardin

### Letters Encouraged

extend an invitation to every student to Talon Marks staff. write letters to the editor. If there is something about the college

or the community that deserves praise or condemnation, let us know. If you have questions which we might be able to answer or ideas you would like to communicate to us or to other students,

## Randall Succeeds Dr. Stamm As Dean of Academic Affairs

Cerritos College is being served by a new Dean of Academic Affairs. He is Mr. Jack Randall and succeeds Dr. Harlan Stamm to the position.

He is also division chairman for the math department, as well as being Director of Extended Day.

Randall earned his B.S. in physical science from C.S.C. at Long Beach and the following year received a masters degree with "great distinction." He will soon be complete work for his Doctors Degree at U.S.C. Randall has studied at both UCLA and at USC on three grants from the National Science Foundation.

He is especially interested in innovation and improving instruction methods. He has been instrumental in the establishment of an "individual studies" program.

The program, according to Randall should be a step forward for education, will allow individual students to set their own learning pace.

They will use a variety of teaching materials and will study only in areas they are not already proficient in. Proficiency is determined by a unit pretest for the classes involved.

Randall is interested in programs where students do a great deal of the work on their own. He would like to have students submit their ideas and is happy to talk to anyone at any time concerning them.

Randall believes in listening to all points of view and feels others in the college can get their points across through the methods of communication already established.

Randall feels that Cerritos students his hope they are channelled correctly. He says there is no need for violent protest and carrying out other unsanctioned actions.

"However," according to Randall, 'the classroom is not the proper place for persons to persuade others into their own particular points of view." "This holds true for students as well as teachers."

Jack Randall Dean of Academic Affairs

Randall not only teaches at Cerritos but he also has taught evenings and during summers at both Cal State Fullerton and at Long Beach City College.

He also served as a mathematics programmer for North American Rockwell.

Aside from his official credentials Randall is also a sports enthusiast. He played for eight years with the Long Beach Nighthawks, a national championship softball team. Besides softball he enjoys playing handball when he has the opportunity. He is also a close follower of Cerritos athletics.

Although Randall is a native of Denver have great powers, but he emphasizes he and his wife now make their home in Los Alamitos. They have two children, a daughter 17 who is entering U.C. Irvine and a son, age nine.

### Library Adds New Services, Research Aids

Incoming freshmen and returning students found a new library to welcome them back. Though the inside is not quite finished in some areas it is open for use.

Sidney Thompson, head librarian, said that most of the student must think that it is still under construction judging from the small amount of traffic since the semester started.

#### **NEW ADDITIONS**

Some of the new additions to the library are forty-eight new studying carrels that are being placed around the browsing circle on the main floor of the library. Just off the browsing area is the new reference rooms, there will be five seminar rooms and one typing room.

Other new additions include four new microfilm reading machines. These four machines, unlike the eight others we have now, will also copy pages on microfilm.

Twenty new paintings were received last week. They were closen with help of the art department and ordered from the New York Graphic Society. They are being placed throughout the library with

the help of an interior decorator. ROOMS UNFINISHED

The rooms and areas of the library that are not finished are the reference room, main stacks (Library of Congress Classification Numbers) and the whole bottom floor. Completion was set for November but opening was set back to a later date to make some changes.

Maps of the library showing all of the room locations are available at the main circulation desk located near the browsing circle for anyone who gets lost among the many rooms of the new three level complex.

### **UCLA Speech Tourney Oct. 9**

According to Mr. Bill Lewis, director of forensics, this year the speech squad boasts 25 with several returning members from last year.

Returning squad members are Steve Berardino, Dale Fiola, Larry Guevara. David Hornsby, Larry Lords, Lou Magdaleno, Gary Rybold, Dede Salla, Kathy Sederquist and Rodney Tucker.

From the high schools new members are, Howard Andrews and Susan Williams, Gahr High School; Debbie Baker and Kimberly Foster, Downey High; Alan Darlow and Dennis Pray, La Mirada High; Deborah Sommers, St. Pius X; John Heredia, Montebello High; Gary Hughes, Warren High; and Verletta Kelsheimer Excelsior High School.

Transfer students are Peggy Bertrand, John F. Kennedy School in Sacramento; Cathy Dahl, Paramount; Gregory Simpson, Long Beach City College; Ralph Taylor, Brigham Young University; and Marilyn Thornton, Gonzaga University in Washington.

Lewis is director of forensics and Ron Tabor is director of debate. Assisting is Bob Dayton.

Plans Future are a speech seminar, October 3, with the first tournament on October 9 and 10 at UCLA.

Icoming Freshmen Face **Fustration and High Hopes** 

Staff Writer his year's incoming freshman have m with some difficulties, but the mority of them have confidence that th are equal to the college task and w survive.

hese freshmen and women have diovered some major deficiencies win Cerritos. One, is that the school is næquipped with left-handed desks. the words of Sandy Gibson, "The

nd for left-handed desks almost drives m crazy." Another student, Deborah Drow expressed surprise that the leure halls in a school this size are not eapped with left-handed facilities.

is apparent that this school is caring to those students that are righthided. These students feel there should bsome kind of action taken to solve this

ccording to other students, a major diculty in adjusting from high school tCerritos is found on the parking lots. A seen by Kathy Wilson, "The front pking lot (c-5, c-6) has so many ways tgo in, but there is only one way to get bk out if you can't find a parking pce." # Gridders Clash With LBCC

### Lang Beach City Invades Falconland; Fdcons Seek to Make It Two in a Row

Ceitos will open its 1970 grid season agair, its old nemesis from the Metro Confence, Long Beach City. The Vikirs will have an edge as they have alresy played one game losing to Fullcon on September 19.

Th game will give Cerritos fans a littleinsight into the chances of a confence champion this season. Long Beac lost to Fullerton 32-18 on the Vikis home field last weekend. It was said at 1969 was a rebuilding year for the ornets as they captured the state titlwith a win over Fresno City. But the ebuilding process appears to be onlyalf as the Hornets are not nearly they some team of last year.

Baca to Wingback Thoffense will have a new look with Joe aca moving to wingback. Baca whovas the Falcons leading ground gain in '69 will also see action at tailbk. He has been impressive in pracee and caught a short pass and rac€70 yards against L.A. Valley in a

presson scrimmage. Rurning letterman Roger Gaylord shod start at quarterback, getting the nod 'er freshman Jeff Brinkley. Dennis Smi is the probable starter at fullback with either Rick Combs or Dave Olehan at tailback. At split end will be Lar Lille or Ken Chupp.

**Defense Strong** 

From defense looks strong with the retu of veteran Dave Campbell, Roy App, and Ed Faulkner on the line. DaySinclair a starter for most of the '69 ason at linebacker is back along witJack Brewer who is potentialy one , graduation. of tl finest linebackers.

To middle backer spot is still sonwhat up in the air. Mike Tafoya and Ric Minnick return to form a strong duct cornerback while Stan McConnell and like Donatelli along with freshman

### **Poloist Open** Stason Today Against C. of S.

ter placing third in the South Coast Coerence coach Pat Tyne looks on the Ceitos 1970 water polo team with apehension. Last year the squad lost eig games to place third in the coerence, fourth in Southern Ca'ornia and at the end of the season thewere ranked sixth in the nation.

This year the team will get moved annd a lot," commented Tyen. The ten this year is small as a whole and retively small in comparison with the reainder of the conference. What they Ia: in size they will have to counter wispeed and skill.

he speed and skill factors with the rarn of John Rees, Reed Taylor, Mike Males, and Rick McShane but whether th will be enough will be determined wen league play opens. Rees, Taylor, at Morales were among the top scorers oilast season's squad while McShane size. s# limited action.

he most outstanding freshmen aording to Tyne and Jim Boltd Dan Arshman and Pete Morales. Today the tims opens play with College of the Squoias in the Cerritos pool at 2:00 p.m. Center: Jerry Ford and Jim Monico.

safety spots.

Vikings Tough

Long Beach was hit hard by with most of the line. But a promising blocker. group of freshman figure to fill their

Leading contenders for the backfield job are a pair of running backs from Jordan High. Steve Helm and Gary Rawson. Helm played freshman ball at UCLA but came over rather than redshirting for the Bruins. Rawson was the leading prep rusher at Long Beach. The passing will be handled by John Edwards who threw for 445 yards and five touchdowns.

His top targets will be Dennis opening kickoff at 8:00 p.m.

Fred Strom are battling for the two Brimhall and Chris Hyta who prep with Edwards at Jordan High. Brimhall, a 5-11 170 pound end with excellent hands, was a first team all-Metro selection last graduation losing their speedy running season. Hyta, the starting tight end last backs Jim Kirby and Lenny Gaeta along year, is 6.0 and 206 pounds and a fine

Defense needs Help

- The Viking defense was hardest hit by graduation with only Tom Knudson remaining to hold down the front four. The loss of Linebackers Tom Hawkins and Buster LaCoste along with safety Wendell Brooks, will hurt the defense if the incoming freshmen are not able to fill their shoes.

The game figures to be one of the typical Falcon struggles with the

### Returning Lettermen Give **Cerritos Offense Strength**

After losing several key players and coming off a fine 7-2 season, it was still undecided. Ford is a returning thought that Smokey Cates' Falcons letterman, while Monico is an all-league would face a rebuilding project for '70 and set their sights on the 1971 conference crown.

But it is doubtful that rebuilding has even entered Cates' mind. He has out replacements to fill the gaps left by

The 69 Falcon squad finished with a respectable 4-2 conference mark in their Brinkly. initial season in the South Coast San Diego Mesa and to state champions Fullerton. Both the Mesa Olympians and the Hornets of FJC will field strong teams again this year.

With the graduation of Mike Ernst, Bain Brick, Dave Hansen, John Morrison, Mark Hemphill, Dave Hansen, and Kevin Johnson, Cates and his staff had many holes to fill. On paper it seems that they have done the job.

This week the Falcon offense will get a stiff opening test against Long Beach City which suffered a 32-18 defeat at the hands of the Fullerton Hornets. Falcon Offense

Wide Receivers: Joe Baca, Larry Lille, Ken Chupp, Gary Sutter, Andre Perez, and Rod Garcia.

Baca, the Falcons leading ground wingback to utilize his great open field says runs the best patterns of any of the call Saturday night.

At Split End Lille and Chupp have locked horns in a real battle for the inexperienced but make up for it with their hard work.

Tackles: John Wray, Steve Hollis, Craig Clark, Jeff Crucil, Paul Gardeckis and Bob Lee. Wray and Hollis have won the starting

berths for the opening game. The rest are inexperienced but counter with good Guards: Ben Price, Tom Woodburn,

Terry Roche, Dave Hibma, Mike Pryslec and Steve Weeks. Price will start on the right side, while

the battle between sophomore Roche and Woodburn for the left side.

One of the strongest spots. Starter is performer from Warren High. Tight Ends Don Medina and Ben Tyler.

Medina was a starter all last year and is considered to be one of the best blockers on the squad. Tyler is a hardreached into his bags of tricks and pulled hitting freshman from Neff High who is currently giving Medina a fight for the right to start.

Quarterbacks: Roger Gaylord and Jeff

Gaylord saw enough action to rate him Conference. Their only losses were to as an experienced Quarterback. A prosize QB at 6-4 215 lb. Gaylord runs with authority as well as throwing the ball very well. Brinkly is a highly-touted freshman from Excelsior High. The addition of Brinkly gives the Falcons a solid 1-2 at this important spot.

Tailback Rick Combs, Dave Olelman, and Paul Rooks.

Combs is a returnee from last year. who saw only limited action but who is running very well in the early going this season and will be tough to move out as the top man. Oelhman, a 9.9 sprinter of this year's cross-country team: from Warren High, and Hooks have looked impressive in the two preseason scrimmages.

Fullback: Dennis Smith, Randy Kit, Bill Boniface, Keith Sexton.

Smith got plenty of action last year. gainer last season, has been moved to He blocks extremely well and can pick up the tough yardage when called upon. running ability. Also at wingback is He has been slowed by a pulled Gary Sutter a sophomore who Cates hamstring although he may still get the

Kit has looked very good in the preseason action. Kit, along with Boniface and Sexton, may be lacking starting position. Both are only in experience that it will take to beat out a healthy Smith.

The Cerritos front line offense looks every bit as good as last year. They have good depth at the center, tight end, wide receivers and the quarterback spots but the others are lacking in the experience that it takes to mold a conference champion.

Injury to one of the starting interior linemen could cause problems because of the experience of the others. Another problem is the overall lack of speed.

Cates' men will test their ability tomorrow against a defense which lost a 32-18 decision to powerful Fullerton last

BIRDS READY FOR ROADRUNNERS --- With two of their top runners returning from last year, Dave Kamanski's harriers will take on the Rio Hondo Roadrunners in their first meet of the year. Pictured above are the top six runners for this season. Standing: from left to right: Roy Essay, John Mendez, Mike Bernal. Kneeling: Matt Berenda, John Fendler, Bob Arce.

### Bernal, Mendez Lead Falcon Harriers In Opener vs. Rio Hondo Roadrunners

Head cross country coach, Dave Kamanski, is once again trying to produce a team of championship quality like his undefeated squad of last year.

Just as last season Kamanski is faced with a heavy turn-over in personnel with just three returning lettermen from last year's team. The Falcons lost both Roy Nilsson, an outstanding miler, and John McNeice, co-most valuable player on the '68 squad, by graduation. But the big loss was that of Ruben Chappins, who entered UCLA. Chappins was the top prep two-miler in the nation with a 8:57 time before coming to Cerritos.

Kamanski has added a fine group of freshmen to his three returning runners and expects a very representative team even though it is small in numbers.

The following make up the personnel Mike Bernal: Established himself

early last year as the number one Falcon runner with a first place finish in the Birds opening meet. He takes to the long distances well and is one of the hardest workers on the team. According to Coach Kamanski he is one of the top distance runners in Southern California.

John Mendez: A sophomore back from last year's team is a very strong number three man. Mendez was also a fine runner in high school where he ran an outstanding two mile in 9:03.

John Fendler: Also a veteran of last year's championship team is a graduate of Norwalk High.

Roy Essary: A freshman from Warren High in Downey will be a good number four man and has turned in a 9:27 time in the two-mile while in high school.

Bob Arce: Also a freshman and one of the many athletes up from St. John Bosco High School. Arce is a 4:24 miler and could very well work into the top five in some way. Matt Berenda: Another freshman

from St. John Bosco was just a shade behind Arce turning in a 4:31 effort in the mile while at Bosco. St. John Bosco High will be well represented as still a third runner,

Cerritos squad from that school. Another new recruit is freshman Dough Anderson, a 1970 graduate of Mayfair High. This team has a tough act to follow as

last year's harriers ran circles around their South Coast Conference opponents in posting a perfect 7 0 record. At this point the team's biggest

problem seems to be finding a strong fifth man. This is all important as you have to have five men finish.

As far as the South Coast Conference goes it seems to be as tough as ever. Coach Kamanski reported that Santa Ana seems to be one of the top teams just coming off of their fine against San Diego City in San Diego,

preformance in the NAAU meet at Griffith two weeks ago.

The coach also stated that his boys were covering a lot of ground in preparing for the long road ahead and that may be the under statement of the season. The members of the cross country team average between eight and ten miles a day seven days a week.

The harriers first challenge comes this afternoon at Lake Legg in Whittier when they run up against the Roadrunners of Rio Hondo.

Conference meets begin on October 2,

### **Cerritos Welcomes Two New** Coaches to Serve on Grid Staff

Two new names have been added to Grim will be taking over the toughest the 1970 season. There are Warren (Rennie) Simmons and the newest member of Cerritos coaches Marvin

ASSISTANT FOOTBALL COACHES

WARREN and

MARVIN

GRIM:

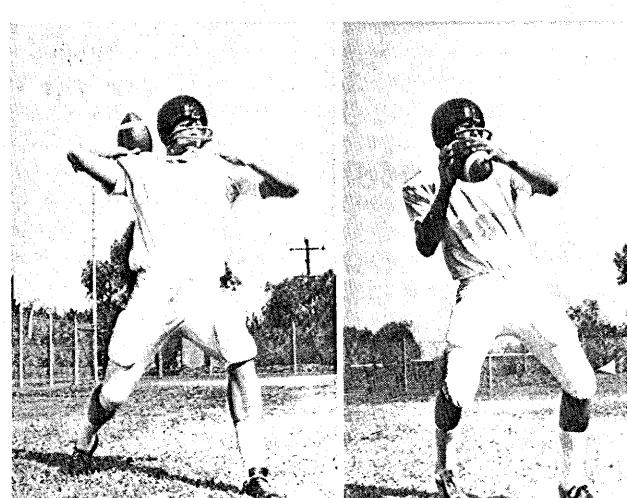

chief of defensive backs. The Falcon defensive backfield figured highly in losses to San Diego and Fullerton. The new coach has some pretty big shoes to fill since he is replacing Dallas

Moon, now an assistant under Dick Coury at Cal State Fullerton, Moon was extremely popular both with fellow coaches and the players. Grim is coming to Cerritos after seven

years at Jesuit High School, There his teams won 21 games, lost 15 and captured one league championship.

"I feel that I am very fortunate to be at Cerritos," said Grim. "It is a real opportunity. Cerritos has built quite a name for itself, and it is certainly a credit to the people of this community."

Simmons is a man who didn't mind waiting for something he badly wanted and his patience paid off when Cerritos officially added him to the staff. Simmons has spent most of his life in the Cerritos area, having served the past two years as a volunteer football coach with the Falcons, donating his time, and earning the respect of his full-time associates. With no opening in the P.E. department, Simmons simply waited for the break that he was sure would

AERIAL ATTACK READY - Sophomore Quarterback Roger Gaylord (right) and freshman Jeff Brinkley prepare for battle ith Long Beach. Long Beach most of their defense including three of their four defensive backs. If Gaylord and Brinkley re on it could prove to be the difference in the ball game.
