Group gets going in counseling look

Ad hoc committee outlines plan for study to improve services

By PHYLLIS DAVENPORT
TM Features Editor

"To study the counseling services of Cerritos College as they now exist; to identify the concerns of students, staff and Board, and to make recommendations which will be responsive to those concerns" are the purposes of the ad-hoc committee set up to examine counseling services said Dr. Louis Wilson, chairman of the committee.

The ad-hoc committee was formed at the request of Merl Doty, Board of Trustees member.

Doty said he realized the need for study from questions that came up during the "New Teachers Seminar" held at the Fall Leadership Conference in Apple Valley on Sept. 7.

According to Dr. Wilford Michael, college president, general questions and comments about counseling procedures instigated the formation of the committee.

Officials stressed that this study is part of an on-going routine to assure that programs at Cerritos continue to be of the greatest possible service to the students.

The committee, which had its second meeting Tuesday, Nov. 1, set down a plan of action to accomplish these goals.

"One of the committee's first tasks is to understand as thoroughly as possible our present system of counseling services," Wilson said.

"We wish to have a broad input of concerns, and suggestions from students, staff and Board," he further stated.

To accomplish this, a survey will be made to receive opinions of the staff, Board and students regarding the counseling services. The survey will be conducted by the Director of Institutional Research, John Queen.

The committee will also contact other community colleges regarding their counseling services.

"Our task, finally, will be to make recommendations for improving services," Wilson said.

When asked how long it will take the committee to review the counseling services and make some positive suggestions, Wilson replied, "It will probably run into next year."

The 13 members of the committee are administrators Wilson, Division Chairman of Science, Engineering and Mathematics; Dr. Robert Bos, Chairman of Counseling; and Dean Paige, Director of Extended Day.

The faculty members are Wendell Hanks and Jerry Shopfner; counselors Bedal Diaz and Wayne Rew; and Board of Trustees members Merl Doty, Leslie Nottingham and Kate Nordbak.

Students are represented by Don Collins, ASCC president; Richard Goul, ASCC senator; and Mike Reed, president of Prosthetics and Orthotics Club.

The committee will have their next meeting Monday, Nov. 14.

Several new bills in hopper could affect Cerritos programs, students if approved

By RICH GOUL
TM Assoc. Editor

A number of Assembly and State Senate bills which would have varying degrees of effect upon community colleges — including Cerritos — throughout the state are currently being considered in Sacramento since the legislators returned to the new session August 1.

While funding of education by some form other than property tax continues to be sought after such legislation failed last session, other bills more specifically applying to the schools are being deliberated.

Under AB50, veteran students enrolled for less than full-time would be able to receive prorated benefits under the Cal-Vet Program. The bill appropriates \$2.3 million to pay for such a program.

AB88, Chacon, would allow Vietnam-era

refugees who have been granted conditional entrant status to be considered state residents for tuition purposes even if he or she has not fulfilled the one-year requirement. AB319 makes allowances for reduction of non-resident tuition and was signed into law earlier this year.

Perhaps the most drastic reform currently being considered is AB 355, McVittie, which provides that students who restrict their availability for work to nonschool hours shall be presumed to be not available for work and thereby not qualified for unemployment compensation insurance benefits.

Under current practice, student status is grounds for ineligibility for compensation. Under AB 355 students could receive unemployment compensation providing they were willing to accept work which might mean withdrawing from their classes. The bill is presently in the Assembly Finance, Insurance, and Commerce Committees. AB 449 by Bruce Young was signed into law and became effective June 28. It requires the posting of agenda items at least 48 hours prior to regular meetings and 24 hours to special meetings.

Credit and non-credit courses will have to be approved by the Board of Governors of the California Community Colleges as well as any new funding for such classes under AB 459, Montoya.

In addition, the county superintendent of schools will be forced to adjust the tax rate of a community college district in response to changes in the average daily attendance.

Under AB 528 the maximum award for California State Scholarships would be hiked from \$2,700 to \$3,200, and California Opportunity Grants from \$3,600 to \$4,000.

Both AB 572, Antonovich, and SB 130, Deukmejian, delete mandatory retirement ages under the Public Employees' Retirement System before 70.

Two voting student members appointed by the Governor would serve one-year terms with the advice and consent of two-thirds of the State Senate on the Board of Governors of

California Community Colleges under AB 591, Vasconcellos.

California State Assemblyman Bruce Young is a member of the Education Committee and represents the 63rd District which encompasses most of the Cerritos College District. He has offices at Room 305, 12440 E. Firestone Blvd., Norwalk, 90650. His phone is 868-0561.

William Campbell, State Senator, receives correspondence at Suite 301, 8060 Florence Avenue, Downey, 90240. He can be reached by phone at 861-6743. Governor Jerry Brown's office is in the State Capitol, Sacramento.

Allowing districts to establish programs in which senior citizens may be used as volunteer teacher aides, helpers, or special aides in various school programs and activities and authorizing establishment of meal programs by districts for participating senior citizens is AB 662, Kapiloff. AB 662 would also appropriate \$300,000 for allocation through a Senior Citizens Nutrition Fund to participating districts.

AB 803, Brown, prohibits discrimination on

No school Friday

Cerritos College will honor Veterans' Day this year on Nov. 11. The college will not be in session on that date.

'Dial 'O' for Emergency' on Campus phone system

By MARTIEAL WILLER
Editor-in-chief

Getting help in case of an emergency on Cerritos campus is easy.

Dial "O" to reach the switchboard or simply lift the receiver of one of the 12 red telephones. These telephones, intended for emergency use only, will automatically connect party lifting receiver with the switchboard. No dialing is necessary.

If the emergency involves a severe injury, heart attack, poisoning or any other serious condition, instruct the operator to call the paramedics. Be sure to describe the nature of the emergency and state the exact location.

The 12 emergency telephones are located at the following locations:

- Admissions Office—Vault, East wall.
- Arts and Crafts Building—Southeast wall.
- Burnight Center—Theatre Lobby, Northeast wall.
- Burnight Center—Music Wing, Northwest wall.
- Gymnasium—Southeast wall.
- Health Science Building—First floor, Northeast wall.
- Health Science Building—Second floor, Northeast wall.
- Liberal Arts Building—First floor, East end of building near stairs.
- Physical Education Building—Lobby.
- Physical Science Building—Northwest wall.
- Social Science Building—Second floor, North wall.

Speech captures tourney trophies

Cerritos Speech Squad members Bill Hiddleston (Norwalk) and Bill Niemand (Downey) teamed to capture 5th place in debate at the Pasadena City College Invitational Speech Tournament November 4-5.

In other events, Niemand took a 4th place and Superior Certificate in Impromptu. Joining him in the awards circle was Russell Wood (Bellflower) with an Excellence Certificate.

Also participating were squad members Adrian Villaseñor (Lakewood), Ray Hernandez (Norwalk), Tom Jones (Cypress), Larry Moff (Norwalk), and Kathie Meyers (La Mirada).

Tournament events included Informative Speaking, Impromptu, Debate, Oral Interpretation, and Radio Speaking.

Speech instructor and coach Donna Grossman points to the squad as completely new from last year and "We're off to a good start!"

Ear Bender and Job Info programs to offer seminars

By LUIS F. CAMPOS
TM Staff Writer

Through the "Ear Bender" and "Job Information" programs, the Career and Guidance Center of Cerritos College is offering seminars to students that need information about jobs within their field of interest.

According to Patricia Cook, Career Counselor, the Ear Bender session gives the student the opportunity to have an updated idea about salaries and the particulars of their field of interest.

What kind of job they are doing? Why they do it? How they do it? How they got started on their field? Employment trends and outlooks, salary ranges and chances for advancement are questions that the students can ask speakers that are already involved in their careers.

Sessions are video-taped for interested students who are not able to attend sessions.

"The Ear Bender is the best way to get first hand information about jobs," said Anna Souza.

Topics for the "Job Information" seminar for Nov. 15 will be Effective Interviewing Skills. Seminars will be given in the Bookstore Room BK-111, 11 a.m. to 12 noon.

According to Cook, people don't know where to start when they are looking for a job. These seminars will also teach the student how to plan ahead and to not wait until the last minute. Do it while you are still a student, she advises. Likewise, apply for a job that you're going to use.

Cook will also be the speaker's group leader. People interested in attending should contact Anna Souza in The Career and Guidance Center to get tickets for it. Admission is free; seats are limited.

There's Gold in them Keys for Cerritos area old-timers

By GARY EHNES
TM Staff Writer

In 1971, the Professions Committee of Cerritos College recommended a program in which the Senior Citizens of the Cerritos College District could get together as a group and just have fun.

It was a proposal that began without many precedents to follow. Although the program is only 6 years old, it is one of the first, if not the first program of its kind for Senior Citizens in Southern California colleges.

The Senior Citizens Program, under the leadership of Barbara Keenoy of Community

Services, started with 15 clubs and now has more than doubled in size since its inception.

The Golden Key Membership and Card is currently held by over 2300 Senior Citizens. The Golden Key Card entitles the Senior Citizen to all the functions sponsored by the college. This includes sports events, concerts, plays and any other student activities.

The single biggest contributor to the programs membership is word of mouth. According to Keenoy, most of the members learned of the program from friends that were already members. Although word of mouth plays a large role in the club's membership, a Golden Key Newsletter is published to inform the members of the upcoming events sponsored by the College.

The very first event of the Senior Citizens Program was a fashion show held at the College. Since then the program has instituted dances with live bands, bus trips, and seminars. The dances are currently held at the Student Center.

One of the biggest events of the year is the Senior Prom. Sponsored in conjunction with the Los Angeles County Department of Parks and Recreation, the Prom is usually organized with the cooperation of one of the Senior Citizens most notable consultants, Rosie Greer.

With the completion of the Cultural Center on the College Campus, the Seniors will have the facilities, not available to them now, to conduct programs and events without conflict with school functions.

Topics of the seminars include "Dealing with

(Continued on Page 2)

Authorities searching for Cerritos rapist

Sheriff's Department officials say that they still have no suspect in custody for the early morning rape of a Cerritos coed in a campus restroom one month ago.

Several suspects have been questioned and released according to a department spokesman.

A composite drawing of the assailant has been distributed. He is described as a "male Mexican-American in his early twenties, between 5-9 and 6 feet tall, of stocky build with heavy thighs. He has short black hair that he combs straight back. The suspect has a medium dark complexion with a severe case of acne covering his entire face giving it a reddened appearance."

...Just lift receiver

News Briefs

DENTISTRY SPEAKER

Specialty programs available in dentistry, trends in dentistry and opportunities after graduation will be discussed in a program presented Thursday, Nov. 10 from 11 a.m. to 12 noon in the Board Room.

Steven Underwood, D.D.S., of the Recruitment and Academic Retention UCLA School of Dentistry, will be the featured speaker. He is a former Cerritos student.

Underwood is especially interested in speaking to minority, female and disadvantaged students who are interested in the dental profession.

Free tickets are available in the Career Center, located in the Administration Building. The Center is open 8 a.m. to 9 p.m., Monday through Thursday, and 8 a.m. to 4:30 p.m. on Friday.

DAKAR TO TIMBUKTU

Scenery of West Africa with visits to Ghana, Mali, Senegal and the Ivory Coast, will be presented in a film lecture by Bill Madsen, Nov. 10 at 8 p.m. in Burnight Theatre. Admission is free.

CERRITOS NIGHT AT DISNEYLAND

Tickets for Cerritos College Night at Disneyland are available at the Ticket Booth in the Student Center Lounge Box Office. There will be no tickets on sale at Disneyland. The event is to be held on Sunday, Nov. 13 from 4 p.m. to midnight.

A ticket provides admission to Disneyland and unlimited use of all attractions (except shooting galleries) plus bands, shows, entertainment and free parking. Admission is \$5.75 per person. There is no limit on the number of tickets a student may purchase.

WOMEN'S CAREER WORKSHOP

"Non-Traditional Careers for Women," a half-day workshop, will be offered through the Community Services office under the Women's Program from 8 a.m. to 12 noon, Saturday, Nov. 19 in the Student Center.

Hallie Tenner, president of the commission on the status of women for the city of Los Angeles, will be the speaker.

The workshop will take a look at unusual occupations for women, how to find them and their advantages and disadvantages. Basic requirements, salary levels and rate of advancement will be featured also.

The fee is \$3, and free child care will be available.

For more information, call 860-2451, Ext. 530 or 521.

YOUNG REPUBLICANS TO MEET

Anyone interested in joining a political club on campus is invited to attend a meeting of the Young Republicans Tuesday, Nov. 16, or Wednesday, Nov. 17, 11 a.m. to 12 noon in LA-29.

Anyone interested but unable to attend, may leave their name and phone number in the Young Republican box in the Student Activities office.

SLAPSTICK SERIES

Two W.C. Fields films will be shown in the Student Center on Tuesday, Nov. 15 at 8 p.m. Admission is 50 cents per person.

ASSEMBLYMAN TO SPEAK

Assemblyman Bruce Young will speak Tuesday, Nov. 15 from 10:30 to 11:30 a.m. in LA 31. The program is sponsored by the Young Democrats Club.

BYU REP AT CERRITOS

Gordon A. Westenskow, Coordinator of School Relations, Brigham Young University, Provo, Utah, will be at the LDS Institute of Religion, 16025 S. Studebaker Rd., Thursday Nov. 17 at 1:30 p.m. to provide information to students interested in transferring to B.Y.U.

JAZZ TRIO IN CONCERT

Louis Bellson, Ray Brown and Paul Smith, three musical greats, will be appearing in concert in Burnight Center, Friday, Dec. 2 at 8 p.m. This will be the first time all three have appeared together. General admission is \$5; students, \$4, with student ID card.

...Emergency

(Continued from Page 1)

p.m., Dean Paige, director of Extended Day Services, should be notified at Ext. 227.

Students are urged by college officials to immediately report all out-of-order pay telephones on campus to the college switchboard. The Switchboard is located at the information booth in the Administration Building.

- Pay telephones are located
 - In front of the Gym.
 - On the south side of the Gym.
 - In the Student Center on the east walk next to the cloak room.
 - In the Coffee Shop. (2)
 - In the Quad area. (2)
 - In the Administration building near the steps on the west side of the building.
 - In the Liberal Arts building at the east door near the stairs.
 - On the first floor of the Health Science building.
 - On the second floor of the Health Science building.
 - In the Business Education building breezeway.

In case of emergency help may also be had by calling the office of the Campus Police located in Burnight Center.

Security officers are on duty from 6:30 a.m. to 11 p.m. Monday-Thursday and 6:30 a.m. to 5 p.m. Friday.

The switchboard is open to receive calls at 7:30 a.m. to 10:30 p.m. Monday-Thursday and from 7:30 a.m. to 5 p.m. Fridays.

EXOTIC COURSE—Biologist Prof. Robin Finley displays some of the materials she uses as visual aids and ingredients—for some of the

concoctions she stirs up in her unique "Plants and Man" course.

—TM Photo by SEAN MULLIN

'Plants and man' course comes naturally for biologist

By GEORGE SONEFF
TM Staff Writer

After visits to Brazil and Hawaii, hours of intensive research and a year of writing to universities, biology instructor Robin Finley has finally turned her idea into reality.

Finley said of her new "Plants and Man" course, which began this fall, "It is a fascinating subject, and it will be of use to the students every time they go to the store. Often, people have no idea what's in the food they're eating."

Finley employs hundreds of slides and specimens to verse students on the origins and uses of fruits, cereals, nuts and many other plants. Students also have the opportunity to taste some out-of-the-ordinary nuts and spices.

"I've made this class my hobby over the past year and it's been an expensive one," admitted Finley.

For her efforts, she now has a variety of intriguing specimens. Among them is a can of a popular Brazilian soft drink, "Guarana," which is made from the seeds of a plant. Finley said the drink contains about 10 times more caffeine than cola. The label claims that, in addition to being a powerful stimulant, it is an aphrodisiac, a dietetic, disinfectant and will bring down fevers. "Guarana" is doubtless a hit with overweight, sick and lazy Brazilian bachelors.

Finley believes her visual aids, many of which were donated by universities throughout the country, are valuable because "It's much better to be able to show the students what they're studying."

Trips to the Sierras and delicate probes with a \$16,000 Scanning Electron Microscope are among the projects used to show the students what they're studying in other Biology courses.

Three field classes — California Plants and Animals, Marine Biology, and Field Botany — are offered only in the spring semester.

The Biology department hopes that the learning experiences provided by visits to such

places as the Sierras, tidepools, various beaches and Joshua Tree National Park will stimulate enrollment in the field classes when spring registration rolls around.

Although enrollment in Biology 10 is always high, instructor John Boyle thinks the Scanning Electron Microscope, a new lab room and sections on Genetic Engineering and cancer have all combined to make this course more fascinating than ever.

In summing up the Biology department he said, "What we try to do is strike a balance between the academic aspect (theories, principles, formulas, etc.) and the applied aspect (things that can be used in everyday life). To strike a balance yourself — a balance between fun and learning — there's always a Biology class."

...pending bills

(Continued from Page 1)

the basis of ethnic group, religion, age, sex, color, physical, or mental disability in any program or activity that is funded by the state.

AB 878, Gage, would exempt student-owned bookstores — such as Cerritos — from payment of sales and use taxes.

In an innovative plan, Assemblyman Vasconcellos has proposed the "Community College Fund for Instructional Improvement" which would support "non-traditional forms, content, and methods of instruction," "individualized instructional programs which require student development of learning objectives through learning contracts." AB 1173, it currently is in the Senate Education Committee.

Still being considered is Assemblyman Paul Priolo's AB 1606, which would allow community college student body associations to levy mandatory student activities fees of up to \$10 per academic year. Similar bills have failed in the past and Governor Brown has indicated that he would veto such legislation.

Ski Club 'Blazing'

The Ski Club will present a 90-minute movie entitled "Blazing Skis," produced by Dick Barrymore. There will be showings at 7 and 9 p.m. on Monday, Nov. 14 in the Student Center.

Presale tickets are available in the Student Center box office and from ski club members for \$2 or at the door for \$2.50.

...Busy seniors

(Continued from Page 1)

Antiques, "Memory: How Good Is Yours," "Playing the Money Game," and "Income Tax." The Income Tax seminar will provide specific information on tax benefits available to taxpayers 65 years and older and basic tax information in special interest areas to Senior Citizens.

Also a seminar titled, "Dealing with the Establishment" will be presented to inform Seniors of their rights in today's society.

The Community Services is currently working on programs that can be taken to the Convalescent Centers of the area. So far, all of the programs for Senior Citizens are for the mobile or not confined Seniors. Next semester will be the first in which a Program for the immobile Seniors will be enacted. Music For Creative Response is one of the first events planned. As yet the special needs of the homes and the immobile Senior are still being studied.

Courtroom reality for AJ students

By LIZ HARRISON
TM Staff Writer

The atmosphere was tense as the trial drew to a close. The defense had been brilliant but the prosecutions rapier closing arguments made their point.

The juror's faces were stern as the judge intoned "guilty," yet seconds later the defendant walked out of the room a free man.

The trial was mock, part of the Administration of Justice program designed to give students simulated courtroom experience.

Administration of Justice courses have been offered since the college was formed, according to Professor Richard McGrath. The courses cover the police, parole and probation fields and the areas of private security systems and private investigation.

The program offers over 30 classes, five of which are the "core" or nucleus.

"In the early days, the course was designed to direct students almost solely into police work; since then it has been broadened to include areas such as the new legal aid program," said McGrath.

Through this course students are prepared

for immediate employment in Federal, State and local fields of law enforcement. For the graduate AJ student, Cerritos counselors will plan a baccalaureate program prior to employment or once having started a career, graduates can continue with advanced courses ensuring rapid promotion in their chosen field.

Professional people already working in some area of the criminal justice field take AJ courses too. For instance, legal secretaries take the Criminal Procedures Class which examines courtroom proceedings.

Private citizens take the course to learn their rights and privileges under the law and sometimes comprise 50% of AJ enrollment according to McGrath.

"In fact," he stressed, "I consider the most important aspect of the course is informing the general public of their rights and duties under criminal law. People need to have a better understanding of how the system operates, protects and doesn't protect."

"By knowing the facts," McGrath continued, "The public can determine what can be done to improve the system, what needs to be changed, retained or strengthened."

McGrath said he lectures to different college

departments and will offer "off the cuff advice to anyone having a problem in criminal law."

The college can draw on the AJ department for assistance in any field of studies dealing with the total criminal justice system. During the mock trials, for example, students from the Court Reporting classes join in the learning experience by transcribing testimony verbatim.

"The reality of courtroom tensions and drama becomes apparent to students during the mock trials," declared McGrath. "Not only do the students voluntarily put in hours and hours of research, but become quite emotionally involved."

"Students can reach such an emotional peak after they've been on opposing sides in 'court,'" McGrath continued, "that I've seen classroom buddies who later wouldn't even look at each other."

That can be cited as one reason why the Administration of Justice program holds interest for many students. Graduates of the AJ program will be able to weigh the pros and cons of any situation, singly or enforce.

The Pilot Mechanical Pencil: guaranteed against physical and mental breakdowns.

The last time your mechanical pencil failed did you heave it against the wall? Or just scream with frustration? Chances are, when your mechanical pencil has a breakdown, you'll have one, too!

That's why our Pilot Mechanical Pencil has an unconditional

2 year guarantee. We're so sure our pencil will be trouble-free, we're willing to repair or replace it free!

Of course, it's easy to guarantee a mechanical pencil that's so well-made. Because our patented brass and copper chuck and our all-metal self-feed mechanism makes it virtually indestructible.

Pilot's Mechanical Pencils come in a wide choice of attractive barrel colors and designs, in extra-fine, fine and regular models.

Pilot also makes super lead! Strong stuff that won't crack under pressure. Comes in 4 different diameters and will fit any make mechanical pencil.

New women's track program off and running at Cerritos

By STEVE EAMES
Sports Editor

In accordance with a provision of Title IX of the 1972 Education Amendments, Cerritos College's coordinator of women's athletics is presently in the process of organizing a women's track and field team.

Besides its compliance with Title IX, the formation of this new program will also satisfy the need for—and the interest in—the sport among a number of women on campus, according to coordinator Rhea Gram.

"There are a lot of fine girl's track teams at local high schools," said Gram, "and we would like to start providing a place for these women to continue their participation in the sport."

Section 96.41 of Title IX states, "Each institution must provide equal intercollegiate, club, recreational and intramural athletic opportunity to members of both sexes."

In this case, "equal opportunity" means the college must provide separate teams for men and women in contact sports and also permit both sexes to try out for a sport in which there is only one team available.

Already there are more than a dozen potential team members and four coaches.

A recent notice for the team in the Falcon Flyer generated 16 responses from girls who are interested in trying out for the team. Several of these early recruits are now practicing alongside members of the men's team as part of Dave Gaudet's track and field conditioning class on Tuesdays and Thursdays from 3-4 p.m.

Gram encourages anyone who is interested to contact her at Ext. 353 on campus or leave their particulars (name, address, phone and event) with Yo, the athletic director's secretary, at Ext. 236.

"They don't have to be experts," said Gram who is also the coach of the coed badminton team, "our coaching staff will help them."

Included among those who will do the helping are volunteer head coach Cindy Kamanski, who will receive assistance from her father and men's track team coach Dave Kamanski. Also on the staff is Gene Martin, assistant coach of the men's team and Gaudet.

"This is a good chance for some of the women on campus to take a little time and ef-

Board approves construction of all-weather track

Cerritos College's Board of Trustees unanimously approved the installation of an \$80,000 all-weather track for Falcon Stadium at their Oct. 18 meeting.

"It should be one of the finest track facilities in the nation," said Cerritos' track and field head coach Dave Kamanski. "This will leave us open to possibly hosting several big meets in the future."

The college is already the host of the annual Muhammad Ali Invitational Track Meet and the prestigious Southern California Relays.

Bids for construction of the rubberized-asphalt track will go out this week and the board is expected to award the contract by approximately Nov. 15. Construction of the project will begin on Nov. 16 with the completion date set for mid-January.

The cost of the new synthetic track, which will provide a better running surface than the stadium's present dirt-track, will be partially offset by lower maintenance costs and income from the additional meets Cerritos will attract.

fort to learn something worthwhile," Gram explained, "and also to get in on the ground floor of a new program."

This program is not entirely new to the college, however. Cerritos pioneered women's track and field competition in the early sixties—being the first junior college in the nation to establish such a team in 1963.

But after a brief history in which the sport flourished on campus, the team got lost in the shuffle of the California community college athletic system' front one organization to another a few years ago.

Now, with its imminent rebirth, it appears that when the team is fully organized and subsequently approved by Don Hall, Cerritos athletic director, it may not be in time for them to compete in the 1978 season which gets under way on Jan. 1.

"Whether we are approved or not," Gram concluded, "we are going to be practicing. We want to be ready for next year."

Much plagued cross country winds up season

Dave Kamanski's cross country team ended a season plagued with sickness, injuries and drop-outs by taking a distant seventh place at the South Coast Conference Championships at Grossmont College last Tuesday.

Defending conference and state champ Grossmont took top honors at the meet with a low 32 points with Fullerton College coming in a close second with 33 points.

Joe Ebner of Mount San Antonio College was the meet's individual winner with an easy time of 20:01 over the four-mile course at San Diego's Morley Field.

Cerritos trailed the seven-team field with 209 points as Juan Hernandez (Downey High) finished 35th at 22:29 to lead the Falcons.

Rounding out the pack for the Falcons were Tim Nichols (St. John Bosco) who finished 39th at 23:14, Roland Gonzales (Artesia) was 44th at 24:25, Rick Williams (La Mirada) was 46th at 24:45 and Barry Hayworth (Warren) was 49th at 25:15.

"What a season," exclaimed head coach Kamanski. "We started out with 12 of the better long-distance runners from our district, but injuries and dropouts left us with only five."

"In fact, this last week, Gonzales was out all week with the stomach flu, Tim Nichols missed three days and Dan Kincaid missed the meet altogether with a back injury and an allergic reaction to his medicine," said Kamanski in examining his team's plight.

Compounding this were three dropped runners: Ron Kutzke (Warren) and Bob O'Brien (Bellflower) quit school, Ron Sexton (Mayfair) quit running for a job, Manuel Boyorquez had to drop school due to sickness and Bob Ridley (Bellflower), the Falcon's top runner, had to quit last month because of a foot injury.

"Under the present conditions, we will not enter the Southern California Championships this Saturday nor the state meet on Nov. 19," Kamanski said.

Kamanski predicted that the SCC will continue its domination at the state meet with possibly Fullerton or Grossmont taking top honors.

Water polo hosts OCC tomorrow

By JOHN ALLISON
TM Staff Writer

Cerritos' water polo team kept their record under 500 by splitting the two contests against Mt. SAC and Fullerton last week.

The Falcons close out the 1977 season by hosting Orange Coast on Thursday Nov. 10, and traveling to Santa Ana on Tuesday, Nov. 15.

On Tuesday, Nov. 1, the team traveled to Fullerton to try to even their record at 4-4 with a victory over the same Hornet squad that defeated them earlier in the season by a score of 12-4.

This time the Falcons stayed within reach for most of the contest. With three minutes left in the game, the score was tied at 9-9. Fullerton then lashed out with a flurry of six unanswered goals. The Falcons were able to get one back, but fell far short, losing by a final score of 15-10. Guy Haarlemmer led the way for Cerritos by scoring four times on six attempts in a losing effort.

The squad managed to stay one game shy of an even record with the trouncing of Mt. SAC on Friday, Nov. 9. The Falcons led by a score of 5-1 at the half and never looked back. Once again it was Haarlemmer summing up the majority of Cerritos goals with eight shots out of fourteen entering the net.

Head coach Pat Tyne seemed pleased with the results of the two matches. "We are getting a lot better. We really are," said Tyne. "We played like we wanted to win and it's a shame that we didn't have two extra weeks of practice."

Women's volleyball performs in Falcon gym tonight at 7:30

By STEVE EAMES
Sports Editor

The women's volleyball team will host San Diego Mesa College here in the gym tonight in hopes of finding some small consolation in the wake of a disappointing debut season in the tough South Coast Conference where they now stand at 2-7.

Last week, the ladies visited Orange Coast College in Costa Mesa where they lost to the Pirates 15-9, 9-15, 9-15 and 4-15. They bowed again Friday here to Santa Ana College 6-15, 7-15, 15-10 and 3-15.

"We started out really well on Tuesday," said head coach Jeanine Prindle. Her team which had beaten the Pirates at the Santa Barbara Tournament on Oct. 30. "But we came out a little flat in the second game and they gained enough momentum to put it all together."

Friday, the Falcons found themselves playing on opposite sides of the net against the state's top-ranked volleyball squad and league-leading Dons, who defeated their hosts 6-15, 7-

Cerritos hosts Pirates in SCC fight for fourth

Falcons shutout, 24-0, by SD Mesa as schedule, injuries take their toll

By STEVE EAMES
Sports Editor

The dark, ominous rain clouds which had doused Southern California with scattered showers Saturday were swept away by a cool, brisk wind that evening—just in time to allow San Diego Mesa College to hand visiting Cerritos College its second shutout in as many days, 24-0.

After being dealt only its fifth blank in a 21 year history the previous weekend by Mount San Antonio College, 13-0, this college's football team in no way expected a repeat performance.

It was a long ride home for the Falcons, who have gone scoreless in their last 10 quarters of play—since place-kicker Tom Martin put a 38-yard field goal through the uprights during the second period of Cerritos' 35-10 loss to Fullerton College on Oct. 22.

In the midst of a three-game losing streak, the Falcons will host Orange Coast College this coming Saturday in a battle for fourth place of the South Coast Conference. This contest will conclude Cerritos' rough six-game home schedule in which they are presently 2-3.

Being 0-3 on the road, the Falcon's overall showing of 2-6 ties the team record for the most losses in one season set by the 1968 squad which was 3-6 on the year. One more loss this season will put the 1977 team in sole possession of a new mark.

The improving OC Pirates, who snapped a five-game losing streak of its own last week with a 33-7 victory over Santa Ana, will be led by quarterback Gary Guisness. Guisness, the second-ranked passer in the SCC, has completed 84-of-166 throws for 994 yards and three touchdowns this season.

His counterpart, Falcon quarterback Kevin Hamilton, is a doubtful starter for Cerritos Saturday after sustaining an injury in the loss to Mesa. Freshman quarterback DuWayne Decker will be ready to start if Hamilton is unable to play.

The combined efforts of Mesa quarterback Steve Fairchild and fullback Mel Fields, which made a shambles of a faltering Falcon defense, in addition to a long list of injuries on Cerritos' roster cumulatively took its toll in San Diego.

Fairchild, the number one passer in SCC found in the Falcon's secondary a vulnerable weakness, completing 23-of-38 passes for 258 yards and a touchdown.

On the season, Fairchild has completed 149-of-276 passes for 2124 yards and 16 touchdowns. The TD aerial against Cerritos was the 30th of his two-year career, blanketing the old record, SCC of 28 set by Steve Myer (Mt. SAC) in 1972-73.

Many of Fairchild's completions Saturday were short, swiping passes to his backs, which were often turned into long gains by key blocks and heads-up open-field running. Fairchild also found his favorite pair of hands, Jerry Everette, on eight occasions for 100 yards including a 17-yard TD in the first quarter which put the Olympians ahead 7-0.

While Fairchild was having another field day

with his opponent's secondary, Fields was busy bursting through gaping holes in the Falcon's defensive line, opened up by Mesa's offensive front five. With a little help, he gained 192 yards on 27 carries and two touchdowns.

Fields' more productive rushes came on delayed draws on which he found a lot of running room between the Falcon pass rush and its secondary. Fields turned one of these draws into a 39-yard jaunt to the end zone late in the second period, five minutes after Mesa place-kicker Al Cullins connected on a 35-yard field goal, giving the Olympians a comfortable 17-0 halftime lead.

Early in the third quarter, Fields capped a 11-play 65-yard drive with a three-yard TD plunge for their final score, 24-0.

While Fairchild and Fields were putting together a combined 450 yard total offense, the Falcon's offense was limited to 188 yards as their running game gained a mere 78 yards. The root of this problem is their offensive line which, like the entire team actually, has been plagued with injuries as all four starters are out for the remainder of the year.

Their totally outmanned replacements offered little pass protection for Hamilton and rarely found daylight for their running-backs.

Jim Copeland led the Falcons with 56 yards on 14 carries to move him to third on the conference rushing list with 559 yards on 101 carries.

Hamilton, the SCC's fourth-ranked quarterback, completed 6-of-15 passes for 64 yards. He gave way to Decker in the third period after having his "bell" rung by a late-hitting Mesa defensive lineman.

Cerritos' deepest penetration into Mesa territory was to the 18-yard line in the second quarter but place-kicker Tom Martin missed on a 47-yarder which had the distance but went off left in a driving wind.

Valero, Sierra players of week

Sophomores Art Valero and Bob Sierra were named the Offensive and Defensive Players of the Week by the Falcon coaching staff in Cerritos College clash with San Diego Mesa College Saturday.

Valero, a 5-11, 230-pound sophomore from La Mirada High, has started in every game for the Falcons and has improved with every performance. An offensive guard, Valero is one of two offensive linemen who has not suffered an injury with the Falcons.

Sierra, a 6-1, 170-pound sophomore defensive back from Norwalk High, had a fine night in the defensive backfield. Sierra was never beaten deep by Mesa's receivers limiting the Olympians to short tosses all night.

Each player will receive two tickets to attend the 1977 Junior Rose Bowl Game on Dec. 10 from the Cerritos Bench Booster Club.

Soccer squad takes to road after five-game homestand

By LUIS F. CAMPOS
TM Staff Writer

A home field advantage gave John deJong's soccer team an opportunity to snap a three-game losing streak last week.

Their 1-1 tie with Grossmont College Tuesday did the trick but on Friday they returned to their losing form against Mount San Antonio College, 3-2.

With three games remaining in the Falcon's disappointing South Coast Conference season, in which they are 1-5-1, they closed out their current five-game homestand Tuesday (Nov. 8) when they hosted Santa Ana. The soccer team then visits Orange Coast College Thursday afternoon.

Last Friday, even though the Falcons appeared to play a much better game than the Mounties, the final score reflected a bitter, 3-2 loss to them.

Knowing their superiority over their rivals, the Falcons took an early, 1-0 lead over Mt. SAC when midfielder Ralph Lahora sent an un-

stoppable 25-yard shot into the visitor's net.

The Mounties managed to tie the match at 1-1 late in the first half despite the Falcon's control of the game. Forward Sergio Templos scored with a well-aimed shot after receiving a good pass from a teammate.

In the second half, Cerritos' new-found playing spirit put the Mounties goal in jeopardy quite a few times, especially with right-winger George Villano being left open very frequently.

Falcon left-winger Ricardo Laris approached a deflected shot by Villano at the goal and gave Cerritos a 2-1 lead 30-minutes into the second stanza.

This lead was short-lived, however, as Grossmont scored on a well-aimed, 12-yard penalty-kick at the 32nd minute to tie the game at 2-2.

Six minutes later, Mt. SAC forward Templos sent a 25-yard shot sailing smoothly over Cerritos goalie Victor Gonzales' head and introduced it into the net. This shot averaged a 3-1 Falcon victory over the Mounties in the first round of SCC action last month.

In Tuesday's match, the Falcons were unable to avenge their first round, 3-1 loss to the Griffs.

Both teams played evenly in the unexciting and scoreless first half.

Falcon forward Bobby Rios put in his usual spectacular performance, feeding his teammates with a lot of good passes. These passes were not approached in the manner they should have been handled by his fellow forwards, however, but they did manage to keep Grossmont's defensive line on their toes trying to put these Cerritos attacks under wraps.

Both teams returned to the second half more determined to win the contest and as a result, the match gained a bit more interest. With the games new, fast flow of action, the Falcons found themselves with many excellent scoring opportunities.

One of these opportunities was converted to the scoreboard by midfielder Ralph Lahora who defeated the Grossmont goalie with a 15-yard for a 1-0 lead.

After their goal, the Falcons continued to pressure the Griff's goalie, who deflected many dangerous shots from Cerritos forwards.

Despite this pressure, Grossmont managed to tie the game when a substitute forward found himself alone against Cerritos goalie Victor Gonzales, to give the game its final score, 1-1.

Page 4

Homecoming plaudits

EDITOR'S NOTE: The following letter, printed in its entirety, was received by Dean of Student Activities Richard Robinson, from Dean of Instruction Ivan C. Malm of Fullerton College. We think it is of interest to all.

The Editorial Board agrees with Dean Malm. Homecoming at Cerritos is something special — thanks to the strong leadership of Dean Robinson, and the work of his staff.

★ ★ ★
This is to express my belated admiration for the really superior pre-game and half-time activities you and your student leaders were responsible for at the Cerritos-Fullerton football game last Saturday night.

Having been on the management end of Homecoming activities at Fullerton College on numerous occasions until a few years ago, I

can appreciate the countless long hours and hard work that went into your production. Quite frankly, I have never seen such a flawlessly staged, well coordinated, and highly entertaining show on the college level. It was first class all the way.

Your student leaders are to be congratulated for their efforts. The quality construction of all the floats, the ceremonies in crowning the queen, the fireworks display, the band and drill teams, and all the rest really made it a terrific production.

I've heard all kinds of laudatory comments from Fullerton students and fans at the game. I think you and your student leaders have set a standard that will be impossible to top.

Again, congratulations to you and the Cerritos students who had a part in your Homecoming activities last Saturday.

OPINION

Violence—to be or not

By COY STEWART
TM Associate Editor

The heated controversy over violence in motion pictures and television has gone beyond hysteria and into the realm of the dangerously absurd. It now seems that McCarthy, as did MacArthur, "will return" because the public outcry is now suggesting — seriously suggesting — that the federal government step in and take measures.

To put it another way: censorship. Because I am, incorrigibly, a dyed-in-the-wool movie buff, I am more than a little alarmed. And while I consider the "greatest" or "best" films I have ever seen to be "Lawrence of Arabia" and "A Man for All Seasons," a look at what you might call my "favorite" films — the ones that are always "fun," no matter how many times I've seen them — would read something like this: "The Great Escape," "The Magnificent Seven," etc. And, of course, the one film I never miss — "The Guns of Navarone." All of them would be on the censor's "blacklist," and I haven't even killed anybody since breakfast.

A glance at newspapers, like the Sunday L.A. Times, for instance, is indicative that a form of "censoring" has already started. While films that portray violence as violent are "restricted" and/or "recommended for adults

only," other films, like "Star Wars" or "The Spy Who Loved Me" are acceptable for the kiddies because the violence is only "fantasy" or "make believe." The complete absurdity behind this line of reasoning — if it can actually be called that — is unfathomable.

If I had a son or daughter — or other — I would make sure that they saw "Straw Dogs," and other films of like genre, for the important reason that they are almost painful to watch, and people get hurt in them. But if only "fantasy" or "make believe" violence is acceptable, it is like raising your children and teaching them that "no one really gets hurt and it's jolly good fun, actually."

Or, perhaps, the alternative might be even worse... the portrayal of no violence at all. This would not eliminate the violent crimes that go on in our society — or any society — but it would do one of two things. It would eliminate any disturbing signs of violence so people wouldn't have to look at it — or it could create a society so psychotic that it was unaware of the violence around it.

And in the end there is always the ultimate danger of all censorship. The "censor" would define what "was" and what "was not" violent. And he, or they, could decide that an idea was too "violent."

Letters to the editor

It's different out here...

Editor,

I am writing this letter to tell you about how hard life is in the major leagues. I'm talking about Long Beach State — where I am now serving a two to three year sentence for journalism studies.

Now, life here may not be as bad as living in Russia or China, it sure has its drawback. When you compare good ol' Cerritos to Long Beach State, you guys are in Heaven.

One of my biggest peeves is what you don't get when you buy a \$10 ASB card. There's also an additional \$13 student union fee.

You don't get to see free movies — all of the movies here are at least four years old and admission is \$1.

As for dance action, there are no live bands. Most all of the dances here are Disco DJ affairs, and again it costs you one "George" to get in.

To make matters worse, it's a dollar and a half to get in to see your own school's football game. I ask myself, "What in blazes is my ASB card good for?"

As to other school activities which I remember enjoying at Cerritos — such as free noon concerts and pep rallies... Well, again they don't have any of these events. All they seem to have here are noon speakers who come out to soap box their views, or others who give out personal tales of salvation.

Among other items that blow me away are no homecoming, only a handful of clubs, awards given only once a year (with an affair not as grand as ours), a \$15 fee for a parking space, and to wrap it all up, many of the professors get very upset when they have to reinvent the wheel for you (re-explain a concept) after a lecture.

The only two good things here are the student union building with its ample supply of sofas and chairs to take naps in, and the Nugget Room where I can have a couple of beers on campus... without having to bring it in a brown paper bag.

That's all the soapboxing I'll do for now. With the grace of God, I may make it out alive as I did at Cerritos.

NASH CONTRERAS
FORMER FALCON

'Late Great Planet' Author to speak

Hal Lindsey, renowned author of the 16 million copy best seller on interpretations of Biblical prophecies, "The Late Great Planet Earth," will speak in the Student Center Wednesday, Nov. 16 at 8 p.m. Admission is \$1.50 for students and \$2.50 general.

Students sink their teeth into dental assistant program

By SUE PAULINO
TM Campus Editor

Many cavities are being filled in local dentist offices by graduate students from Cerritos who have completed the dental assistants program.

"We get excellent acceptance by dentists in the area," says Betty Bliss, dental assisting department chairman.

The dental assisting program was one of the first programs on campus, originating in 1959. From its original cramped existence in the physical science building, the program is now situated in the two-year old Health Science building.

An impressive array of five dental units, four x-ray machines, and even a dark room for developing x-rays is contained in the dental department of the building.

The dental assisting program at Cerritos offers two options to the prospective dental assistant. A student may choose to complete the program in the classes required just in the order they are taken. Students completing the one-year program obtain a certificate of achievement, while students finishing the two year program receive the A.A. degree.

Freshman students in the dental assisting program enroll in classes such as dental science — anatomy, pathology, and microbiology, chairside dental assisting and dental materials.

Sophomores take advanced classes in chairside assisting and dental materials, and also classes in radiology. They also go to the UCLA and USC schools of dentistry and work with the senior and junior class students there.

In the final semester of the program, dental assisting students go out into the community and work with dentists to gain experience. They are often hired by the dentist they practiced with after they have completed the program.

Students completing either the one-year or the two-year assisting program are qualified to work in a dentist office as a dental assistant.

A dental assistant can perform the duties of the office manager and handle the front desk, or they can work chairside with the dentist.

"The job market for dental assistants is very good. There are many more jobs than there are people to fill them," says Bliss.

Bliss predicts that upon completion of the dental assisting program most of the 60 sophomores and 50 freshmen currently enrolled in the program will be employed in the dental field.

Some students who have completed the dental assisting program choose to go on and enroll in the dental hygiene program. In fact, one third to one-half of all dental hygiene students were former dental assisting students. The advantage of doing this, Bliss explains, is to give the person the opportunity to see what they are really interested in and want to do as a profession.

The wages a dental assistant receives are fairly comparable to other jobs of equal skills. Basically it depends on the individual policy of the dental office. Of course, those in the registered dental assistant category command a higher salary than those who are not. Also, for all assistants proportionately as the skills develop the salary increases.

Although the dental assisting field is not open solely to women, there is not much demand or employment available for male dental assistants. This is not to say there are no males in this field. There are also a number of male dental hygienists. Most of the time, though, men interested in the field of dentistry choose to work in dental labs or go on to become den-

tists. They may also work in clinics and institutions.

Dental assistants, male or female, may choose to work in county, federal, or civil service positions. Also, after assisting for about five to seven years, one may choose to become a dental assisting instructor.

The dental assisting program at Cerritos employs three full-time and three part-time instructors. The full-time instructors are Betty Bliss, Brenda Becker, and Joleen Fallor. The part-time instructors are Dr. Terrance McCarthy, Dr. Charles Banasky, and Patricia Mueller.

Bliss is also the advisor of the dental assistants club, Tau Rho Beta, a 35 member club composed of future dental assistants.

Weekend classes meet many needs

By TOM BRAY
TM Staff Writer

The "Weekend College" offers students who find difficulty in enrolling in classes during the weekday and evenings a chance to continue their college education. Housewives and working people find this a useful time to take college courses, according to Paul Boatner, director of Admissions and Records.

A total of some 500 students are enrolled in 20 Saturday courses this semester. A few are Data Processing, English I, Furniture Manufacturing Technology, Industrial Arts and Photography.

Some others are Math 21, 23, 30, Office Services, Physical Education, Plastics Manufacturing Technology, Psychology, Real Estate and Spanish 23.

"Most people take a course because it meets a particular need for their employment, instead of just a personal need," said Boatner.

"Lots of students are enthusiastic about Saturday classes because Saturday is the only time they can take a class," he added.

Evening students 'rap' with reps

Another attempt was made at dealing with the on-going problem of communication between night students and student government at a recent "rap session" held in the Elbow Room.

David George, the Associated Students of

Center programs helping women return to school

By MARGUERITE KOSTER
Associate Campus Editor

In a continual effort to reach the needs of the community, Cerritos College has developed two additional services — the Women's Program and the Center for Today's Women.

"Women helping women" is the theme behind the program, says Vera Eckles, coordinator at the center. "We're primarily geared to make women feel comfortable and make coming back to school easier," she added.

The Women's Program was developed in 1973, and was basically a series of non-credit classes, mini-lectures and "brown-bag rap groups." A status-of-women advisory committee developed the programs, and the committee was open to business women in the community.

In 1975, a new women's advisory committee was established under the direction of Dr. Fran Newman, administrator of the Women's Program. The committee has representatives from the faculty, student body and leading women in the Cerritos district.

The courses offered in the program have evolved over the past few years into credit and non-credit classes, depending on the status of the course. Several are offered in conjunction with other departments such as Community Services and the Business department.

Classes are aimed at a wide variety of interests and include basic credit courses such as English, Math, History and Business — all geared to the adult woman returning to school.

In addition to these are the non-credit courses such as "Increasing Self-Confidence for New Employment," "Non-Traditional Careers for Women," and a rape workshop held in the early part of this year.

The Center for Today's Women has its start in October of 1975. Originally located in the Student Lounge, it was moved in January of 1976 to its present location in the Administration Building, and has been open full-time for 10 months.

The Women's Center provides a multitude of services, and according to Eckles is a place where women can "come to feel comfortable and wanted. A place where they can get information. We have had close to 2,000 women in to use our services since we've been open."

The Center also publishes a monthly newsletter which is distributed to teachers in the Women's Program, and is trying to get together a book of poems from contributions of women on campus.

The Beta Theta Gamma sorority is an offshoot of the Center, and is directed to returning women who "want to become a greater part of Cerritos College."

The services available at the Women's Center include information on free legal counseling, free health clinic and abortion referral; a counseling and job information file; and a lending book service comprised of paperbacks donated by students.

"The word is getting around," said Eckles. "No matter how small or how big the problem is, we'll help them. We've been able to express the feeling that this place, belongs to everyone," she added.

'Rip Van Winkle' Tryouts held today

Tryouts for the next Cerritos Children's Theatre production "Rip Van Winkle" will be held today in Burnight Theatre at 4 p.m.

Auditions for singing and dancing and acting parts will be conducted.

The five performances of "Rip Van Winkle" are scheduled for Cerritos audiences on Feb. 24, 25 and 26. The show will then tour to Culver City, Citrus College and El Camino College.

Rehearsals will not begin until after Jan. 1, 1978.

Print in Gallery

An invitational print exhibit featured now through Nov. 29 is the second portion of a six-exhibit art show sponsored by the Cerritos Art Gallery. The invitational exhibit features works by Annette Bird, Maurice Gray, and Cerritos instructor, Diane Marks.

The gallery is located near the center of the campus in the Arts and Crafts building and will be open Monday and Wednesday 11 a.m. to 9 p.m., Tuesday and Thursday 9 a.m. to 12 noon and 4 p.m. to 9 p.m. Friday hours are 11 a.m. to 3 p.m. There will be no showing during the Thanksgiving holidays Nov. 24 and 25.

The exhibition is free of charge.

CERRITOS COLLEGE Talon Marks

Production and printing of Talon Marks is funded by the Associated Students of Cerritos College. Facilities and supervision are provided by the College. It is produced by students enrolled in the academic journalism program.
