## Student senator, footballer Jim Copeland steps out to new rushing, kick off record

By MARGUERITE KOSTER  
TM Assoc. Campus Editor

Football player Jim Copeland knows where his goals are — not just on the field — he means business, too.

Copeland, 19, is a tailback on the Falcon football team, an ASCC Senator and is currently carrying 16 units toward a major in Business Management.

As a result of his efforts on the gridiron this season Copeland was named Most Valuable Back, Most Outstanding Back, Most Outstanding Player of the Year, All-Conference, and All-American Honorable Mention at the school football awards banquet Dec. 7.

"I like competition more than anything," says Copeland, and his 95-yard touchdown against Bakersfield early in the season was the longest kickoff return in Falcon history, replacing a 15-year standing record of 93 yards.

Copeland reinforced his status in the third match of the season against Cypress, when he carried the opening kickoff 98 yards for a touchdown. His second kickoff completion established another record, that of being the only player in the history of the South Coast Conference to run back two kickoffs for a touchdown.

When the final 1977 Falcon football statistics were tallied, Copeland set a new Cerritos College single season record for kickoff returns, rushing 464 yards in 13 attempts for an average of 35.7 yards.

## Group formed to create plan covering emergency measures

By TIM CARTER  
TM News Editor

An Emergency Preparedness Committee has been formed on the Cerritos campus to implement Board of Trustees Policy 8120.1 which stipulates that an "operational plan" should be drawn up.

The primary purpose of the committee is to equip a disaster vehicle that will be able to respond to emergencies on the campus. A war

## Minority students offered scholarships

The College Entrance Examination Board (CEEB) is offering engineering scholarships for minority students transferring to a four year college.

The program of financial aid, supported by the General Electric Foundation, is looking for selected minority students who have completed the associate degree at a community college and are ready to transfer to a senior institution to complete study for a bachelor's degree in engineering.

Applicants must be black American, Mexican American, Puerto Rican or American Indian and a United States citizen or permanent resident.

Applicant must have completed at least 60 semester hours by the end of the 1977-78 academic year and in addition have completed mathematics through calculus, one year of physics and one year of chemistry.

Interested students should contact the Financial Aids Office.

In addition, Copeland was first in rushing this season with 775 net yards gained in 134 attempts for four touchdowns.

Copeland attributes much of his success to the assistance he received from the coaching staff. "They're the best coaches I've ever had," said Copeland. "Not only did they help me in football, but they helped me get situated in school," he added.

Copeland's achievement doesn't end on the field, however. His election to the student senate this semester, "makes me feel like I can put my words, my opinions to use," he said.

"I'm really kind of shy when it comes to saying what I want to," added Copeland. He plans to continue in the senate as he has "just got the feel of things" this semester.

Originally from Michigan, Copeland is one of seven children ranging in ages from eight to 28. He attended Ann Arbor Pioneer High School before moving to California with a friend whom he now shares an apartment with.

Copeland's interests include ice skating, running track, coaching a girl's football team, and working with children. One of his main hobbies is tinkering with stereo equipment.

Included in his curriculum this semester are courses in Business Management, Earth Science, English, Leadership and Physical Education.

"I was really proud of myself last year,"

Copeland stated when recalling his overall G.P.A. of 3.2. Receiving good grades is a top priority on his list.

In addition to his studies, Copeland also works part-time on campus in air conditioning.

After receiving a degree in Business Management, Copeland says he would like to "be a big president in a big company," and "get enough knowledge to get my own business," he added.

"I have the feeling I'd like to get out and start making a living," Copeland states. "I want to do just about everything on my own."

Copeland plans to continue in football, and feels he needs to gain 12 to 13 pounds to reach his ideal weight of 185 to 187 pounds. Despite a healing shoulder and ankle injury sustained this past season, he would eventually like to play football possibly for UCLA.

PIPE IN LINE—Workmen recently replaced a 6-inch irrigation line through Parking Lot C-9. The installation by-passed trees and shrubbery which had cracked old lines.

## Students must elect rep for Trustee seat

By TIM CARTER  
TM News Editor

A new Assembly Bill, recently signed into law by Governor Jerry Brown will have virtually no effect on the Cerritos College Board of Trustees. The Board has been complying with the law since 1967.

The new law states that, "A nonvoting student member shall be seated with the members of the governing board (Board of Trustees) and shall be recognized as a full member of the board at the meetings, including receiving all materials presented to the board members and participating in the questioning of witnesses and the discussion of issues."

The student will be a full member of the Board with the exception of voting privileges and the attendance at executive sessions.

Ten years ago the Board initiated the policy of seating the current student body president at the board table, with full privileges except for voting and executive sessions.

The new law will not affect this practice.

However, the bill does state that the student body must elect the student member to the Board and that the Board must determine how the student member is to be elected.

In order to comply with these stipulations, two bills were introduced at last week's Associated Students of Cerritos College (ASCC) senate meeting. However, the two bills were tabled because many senators were not familiar with the specifics of the legislation.

The two bills will be reintroduced at today's senate meeting where passage is expected.

The first, Senate Bill 1508, deals with changing the Government Organizations Code, and the Elections Code to comply with the Sacramento legislation.

The first resolved section of the bill would change section 2.742 of the Government Organization Code to read, "The President of the Associated Students shall be the official representative of the Associated Students. The President shall be the student member of the Cerritos College Board of Trustees."

The second resolved would add a new paragraph to the section that would require the student body president and vice president to be residents of the Cerritos Community College District throughout their terms of office.

The third resolved would add section 3.55 to the Elections Code that states, "The Election Board shall designate on all official printed ballots that the ASCC President shall serve as the Associated Student Body member to all Board of Trustee meetings."

The second bill, SB 1509, states that the District Board of Trustees and the President of Cerritos College have recommended that the Associated Students make necessary amendments to the Constitution of the Associated Students to comply with Assembly Bill 591.

As the Constitution can only be amended by a two-thirds majority of those voting in all campus elections, two proposed amendments will, with the passage of SB 1509, be placed on the spring 1978 senate election ballot.

The first amendment states, "The President and Vice President shall be residents of the Cerritos College District."

The second proposed amendment states that, "The President of the Associated Students shall be the student member of the Cerritos College District Board of Trustees."

The two bills will come up today at the weekly meeting at 2 p.m. in BK112, adjacent to the Student Activities office.

### BANQUET TICKETS ON SALE

The 1977 ASCC Fall Awards Banquet will be held at the Golden Sails Inn in Long Beach Jan. 20 at 7 p.m.

Tickets are \$5 each and will be on sale in the Box Office from Jan. 3 to Jan. 17.

## Cerritos receives large grant for solar energy program

The Science, Engineering and Mathematics Division has received a \$7,200 grant from the Energy Resource Conservation and Development Commission to develop a demonstration and teaching project in the field of solar energy.

Claude Hartman, project instructor, said the funds would be used to construct a solar water heater to provide hot water for the natural sciences building on campus.

The specific goals of the project include documenting daily and weekly demand, aid other institutions in the evaluation of solar energy use for facilities of similar size, provide experience in the design and maintenance of a solar system and develop an education course in conjunction with the system.

Hartman said the course would be a step towards the development of a Solar Energy Technology Program.

"One of the important factors in the Solar

Student Dean, Don Siriani addressed the senate, answering questions on teacher evaluation and the creation of a free speech area (with a podium) on campus.

Senator Goul, who has voiced approval of the publication of teacher evaluation results, asked Siriani what steps would be necessary to make them public.

Siriani stated that the evaluations had gone the full gambit, and gave a brief history of the evaluations, from the time ASCC financed and distributed their own evaluations, and the results were sold at registration time.

He further stated that if the senate is sincerely concerned they should first evaluate the current process from the students' point of view. Secondly, he suggested they formulate the "what and why" they would like the evaluation to be.

"We still carry the wounds from when the students conducted the survey. Teachers thought we were out to get their jobs," he stated. He added that any move in that direction would probably result in threats of lawsuits from instructors who are opposed to publication of the results.

A recent bill passed by the senate asked the Administrative Council, of which Siriani is a member, to allow the erection of a podium in the quad for the creation of a free speech area.

Asked about his position on the bill, Siriani answered that he saw no need "For a podium out there when if someone wants to present a program, all they have to do is come to us and we'll provide the facilities."

"What I think you're trying to do is guarantee an audience and I'm opposed to that," he said.

## Democrats club sponsors series of discussions

Reactivated this fall after a semester's hiatus, the Young Democrats will feature La Mirada City Councilman and Cerritos instructor Sherill Moses at their first organizational meeting this Thursday Dec. 15 at 11 a.m. in LA 20 to set policy and platform as a precedent to the series of talks with area political leaders and activists that the club will sponsor this spring.

"At this stage I don't believe we should necessarily take dogmatic alliances with Democratic Party platform," said Rich Goul, club spokesman. "The philosophy of this group depends on the views of the individuals involved."

California State Assemblyman Bruce E. Young spoke on November 15, and the group in January will sponsor a series of discussions about the current Washington debate on public funding of abortions and the drive for a constitutional amendment to define human life as beginning at conception — a move that would reverse the 1973 Supreme Court decision legalizing abortion.

"We'll try to present varying views regarding the general issue of the quality of life," said Goul. "For instance, with the abortion issue, the popular argument that ending the life of an unborn child is a woman's right is countered by one which asks, 'wait, what about the rights of the child?' New York Congresswoman Bella Abzug has referred to it as an inalienable right, while black leaders such as Jesse Jackson and Dick Gregory regard it as genocide, 'likening it to the 1856 Dred Scott case that defined black humanity as property ... It's an issue.'"

The environment, education, taxation, social welfare, as well as political candidates and office holders will be focused on in the forums.

The solar panels are expected to be installed by March, 1978, and in operation by April. If the solar technology course is eventually approved, it will include courses in heat fundamentals, collector design, heat transfer systems, fluid handling, storage media, control systems, space heating and cooling, and economic analysis.

# News Briefs

## MEXICAN BALLET TONIGHT

The Cerritos Ballet Folklorico will present Las Posadas Wednesday, Dec. 14 in Burnight Center at 8 p.m.

The program will interpret several regional dances that depict the lifestyle, costumes and culture of historic and contemporary Mexico. Admission is free.

## LIBRARY HOLIDAY HOURS

Students who wish to put in extra study time in the library during the holidays may do so from 8 a.m. to 4:30 p.m. Monday through Friday the first week of vacation (Dec. 19-23) and Tuesday through Friday (Dec. 27-30) the second week of vacation.

The library will be closed Monday, Dec. 26.

## FREE FILM

"Lady Beware," a rape awareness film will be shown tomorrow evening Dec. 15 in the Health Science Lecture Room at 7 p.m.

Sgt. Bill Graves of the Norwalk Sheriff Station will conduct a question and answer session following the showing of the film. Admission is free.

## DONATE A TOY — NEW OR USED

The Psychology Club is collecting new and used toys to be donated as Christmas gifts to Children's Hospital in Los Angeles.

Anyone wishing to contribute toys or games in good condition may take them to the Student Activities Office through Friday, Dec. 16. Donations need not be gift wrapped.

## FRENCH FILM

"The Sleeping Car Murder," a French mystery film will be shown Thursday, Dec. 15 in Burnight Center at 7:30 p.m.

The film features French dialog with English subtitles. Admission is free.

## ARTISTS RECEPTION

An opening reception for artists Ray Bingham, Michael Daniel and Richard A. Lopez will be held Jan. 3 from 7 to 9 p.m. in the Art Gallery.

The public is invited to attend the reception and view the display of transparent watercolors by the three artists. The showing will continue through Jan. 20.

## TM GOOF

Talon Marks is sorry for the misprint in the Dec. 7 CampusScene.

The 14 pledges of Phi Kappa Zeta listed as new members were neophytes.

## LMC site of artistic display by students

Paintings and drawings from the art classes of Claire Keith and Manuel DeLeon are on display in the Learning Materials Center (Library).

The work of students in "Fundamentals of Painting" class, "Painting and Composition" and "Freehand Drawing" classes are displayed.

According to Keith, the art will be displayed through the first week in January.

## TV changing channels of learning

By TOM BRAY  
TM Staff Writer

TV classes are said to be an advanced way of learning material nowadays in an advanced society of technology. Many say it gives learning a new look and is a challenging way to learn what a particular course is all about.

Six TV classes are offered on campus this semester. "Earth, Sea and Sky" (ESCI 20), taught by Joan Licari, is a two unit class and is shown on KABC Channel 7.

"Age of Uncertainty" (ECON 10) is taught by Jack Jeppesen and airs on KCET Channel 28.

"Foods for Modern Family" (HE 71) is a three unit class offered by Harriet Paine over KNXT Channel 2.

"Family Portrait: A Study in Contemporary Lifestyles" (SOC 15) is a three-unit study offered by Connie Mantz through KABC-TV.

"As Man Behaves" (PSYCH 10) is a two-unit class conducted by Todd Gaffaney and KNXT Channel 2.

"Freehand Sketching" (ART 85) airs over KTTV Channel 11.

A total of 1,050 students are enrolled in TV classes this semester. These students take two exams, a mid-term and a final, similar to other courses on campus.

"The future looks excellent for TV classes here at Cerritos," said Dean Paige, director of extended day services. "Last spring we increased the number of classes from four to six."

## Women's sorority to hear series of programs

Beta Theta Gamma is a sorority for women who for one reason or another, have had their education interrupted and have decided to return to school.

The newest sorority on campus is headed by Elizabeth Harrison and boasts of more than 20 members. Donna Welke serves as vice president and Marge McLinden as secretary-treasurer. Martieal Willer is publicity chairman.

The sorority meets twice a month from 11 a.m. to noon in the Board Room.

Five informative programs have been set for 1978.

On Jan. 10, Olive Scott, dean of academic affairs will teach the audience how to "Color Code Your Wardrobe." Emphasis will be placed on determining ones most complimentary colors and planning an entire wardrobe around a personalized color scheme.

March 7 Margaret Baird, professor of office occupations, will reveal "What Your T's Tell About You." Baird will point out how graphoanalysis is fast becoming a significant technique selection, placement, and promotion of personnel in business.

Dr. Allan Boodnick, division chairman of fine arts and communications, points out ways to gain insight from a disintegrating relationship in his message "What to do after 'That Relationship Ends,'" on April 11.

Donna Grossman, associate professor speech and Wendell Hanks, assistant professor speech and humanities, will team up on May 9 to show the group "How to Start a Conversation and Keep It Going."

On June 1 Connie Mantz, assistant professor sociology and psychology, will deal with demands people make on ones time. She will also explain ways to avoid the superwoman trap.

Patricia Lewis, counselor, serves as advisor to the sorority.

## Cafeteria offers more than meat and potatoes faire

By JOHN ALLISON  
TM Staff Writer

The food is usually the subject of class in complaints at hospitals, military bases, prisons and colleges.

Not so with the meals served in the Cafeteria here at Cerritos. Seldom will you get a bad comment on the quality of the food the chefs prepare.

"All of the food is prepared by students," says Tom Back, head chef and instructor of most cooking classes. "The students prepare three entrees per day. This includes a meat dish, one chicken or fowl entree, and one fish or casserole dish."

The meals are priced approximately at cost, depending on the current budget. "The students who eat in the cafeteria are getting

## AMAN COMING

Cerritos Community Services will co-sponsor the 60 member folk dance group, Aman, with La Mirada Civic Theatre on Saturday, Jan. 14.

Ticket information may be had by calling Ext. 357.

A philosophy class, a gardening class, and a class which will focus on the study of Mexico City are being considered for the upcoming spring program according to Paige.

Purchasing Director Loeffler

## BOOKSTORE TO TAKE INVENTORY

The Bookstore will be open from 8 a.m. to 4:30 p.m. Dec. 19-23 but will close for inventory Dec. 27 until Jan. 3, 1978.

for the most part a \$7 or \$8 gourmet meal for usually under \$2," says Back.

In addition to cooking the lunches, the students in the food services program bake donuts and cookies for the snack bar. Occasionally they bake pastries when the classes are covering that item in their studies.

The food services student has a full program of 12 units and spends nearly all of his time in the kitchen. Once the student has completed the required course of studies, he can be hired to do any one of many types of cooking. There are openings often in banquet style cooking, cooking for large numbers (for a hotel or cafeteria), or short-order cooking.

Head chef Back stated that most of the students attain the majority of their knowledge through practical experience. Back has had jobs at Yorba Linda and Virginia Country Clubs, where he spent seven years as master chef.

Back also has a major interest in the purchasing of the ingredients to their dishes.

"We buy fresh vegetables when we can afford it," "We use nothing but choice grade meat, and none of our baked goods are bought frozen."

The cafeteria is located on the Southeast end of the quad, and is open from 7:30 in the morning until 8:30 in the evening on Monday thru Thursday, and from 7:30 a.m. until 3 p.m. on Fridays.

## Director of Purchasing shopping for best buys

BY GEORGE SONEFF  
TM Assoc. Editor

He may start the morning by closing a deal for a \$30,000 camshaft grinder and end the day placing an order for a batch of frogs.

That's what Robert Loeffler likes about his job as director of purchasing for Cerritos.

"I have to know a little about everything, because I buy a little of everything," he says.

Loeffler and his staff of four are weighed with the considerable task of getting the best value for the school's buck on all the supplies and services needed to make the Cerritos machine click. According to Loeffler, the only areas that handle their own purchasing are food services and the bookstore.

Over 9,700 purchase orders, totaling about \$6.7 million passed over Loeffler's desk last year.

Included in the 1976 shopping list was everything from hospital beds and sewing machines for the Health Sciences building to frogs and mice for the biology department and plants for the greenhouse.

Buying large quantities of many different items is nothing new for the 36 year-old purchasing director. After earning a Bachelors degree in History and Political Science from Parsons College in Iowa and a Masters in Business Management from Pepperdine, Loeffler was a buyer for the Navy before coming to Cerritos in 1974.

Purchasing for a company can get boring because you tend to specialize and usually buy the same types of things over and over," observed Loeffler. "But in this type of purchasing (for Cerritos) you're always working on different jobs."

One of his biggest jobs this year has been furnishing the new Auto Tech Center. Furnishing covers everything from arc welders to carpeting.

Even though the auto center won't be open until next fall, many items have already been ordered, because in addition to finding good deals, Loeffler must also make sure the goods arrive and are installed by the given deadline.

By the time that deadline rolls around, the auto center will be filled with \$475,650 in furnishings—ranging from a \$20 compression tester to a \$30,000 camshaft grinder.

Loeffler found it much easier to buy the compression tester, because items costing under \$150 are ordered without much shopping from a supplier known to be reliable. Loeffler checks a number of sources on the more expensive goods, and any purchase over \$3,500 must be approved by the Board of Trustees.

Loeffler was just under that mark in spending \$3,280 for new concrete benches and planters for the reflecting pool at the Student Center. Also included in the deal were new trash receptacles to replace many of the galvanized metal cans found around campus.

Even though this purchase didn't require approval, Loeffler researched it with care, visiting a manufacturer to learn something about the product and then getting bids from three companies before making a decision. He said the benches and planters should be in place by the end of Christmas vacation.

"This job requires an extremely fast pace," said Loeffler. "We have to shop for almost everything to get the most for our money."

But once the shopping is completed and the purchase is made, Loeffler is still not out of the picture. He is in charge of the school warehouse, where many of his purchases wind up. However, he is quick to point out that a competent warehouse supervisor handles most problems for him.

As if this doesn't give him enough to do, Loeffler is also responsible for the operation of the Campus Police. Again he is saved by a supervisor. The only way Loeffler could explain the relationship between purchasing and the Campus Police was by saying, "the job was here when I arrived."

Loeffler just can't seem to fight off the urge to go shopping. He, his wife and two children have recently moved into a new home and buying things and fixing up the house have been his only hobby of late.

Ah, a fringe benefit. "No, I end up buying from Builders Emporium and Handyman, just like everyone else," he confessed.

HELP WANTED—Part-time evening aide for disabled young woman.  
9 hours per week. \$4 per hour.

1-213-923-4874 evenings

## Speaker attacks ol' holiday blues

Dr. Marie Boylston, director of College Hospital spoke on "Conquering the Holiday Blues" at a recent meeting of Beta Theta Gamma Sorority.

Boylston offered ideas on dealing with past influences and present life changes that affect ones perspective of the holiday season.

Practical techniques on how to identify, prevent and cope with seasonal depression was covered.

A question and answer session followed the lecture.

Nancy Welter, founder and past-president of Beta Theta, told the group how Cerritos College influenced her life as a re-entering student.

The next meeting is scheduled for Jan. 10, 1978 at 11 a.m. in the Board Room.

## Copeland, Murvin take top honors at football dinner

By JOHN ALLISON  
TM Sports Writer

The 21st annual Cerritos College Football Awards banquet was held last Wednesday, Dec. 7 in the Student Center.

Runningback Jim Copeland came away with top honors, receiving both the "Player of the Year" and "Most Valuable Back" awards.

A freshman from the state of Michigan, Copeland was Cerritos' leading ground gainer, rolling up a total of 775 net yards over the season.

Bill Murvin was selected as "Most Valuable Player". The six foot, 195 pound sophomore from St. John Bosco saw action in three different positions.

As a receiver, Murvin caught 16 passes for 119 yards and two touchdowns. He also was used as a backup quarterback and reserve runningback.

Sophomore Brad Streelman was awarded "Most Valuable Lineman." Streelman, along with Copeland, was placed on the All South Coast Conference first team.

Awards were given to Mark Chandler and Nick Kliffort for most inspirational and most improved players, respectively. The Captains Award went to Paul James.

Sponsored by the Cerritos Bench Club, the event saluted the 20th anniversary of Cerritos football. Several members of the 1977 team were present.

Cerritos' first football team practiced at local high schools and converted a cow barn into a locker room. "They weren't really cow barns," said Dr. Earl Klapstein, Cerritos' first football coach. "They were more like, high priced cow hotels."

Under Klapstein, the first Falcon football team posted a remarkable 9-1 regular season record and was selected for the prestigious Junior Rose Bowl.

The "Cinderella" Falcons, as they were known, were led by All-American Ray Adermann. Adermann still reigns as the only back for Cerritos to rush for more than 1,000 yards in a single season. Several of the team members went on to play professional ball.

Wednesday evening capped a disappointing 2-8 season for this year's Falcon squad. Several of the key players will be returning for next year's team, and the coaches are looking forward to a successful 1978 year. Once again, the Falcons will open up their season against Bakersfield at Bakersfield.

## Hoopsters end six-game win streak as referees contribute to loss cause

BY STEVE EAMES  
TM Sports Editor

Los Angeles Harbor College's star forward, Chris Thomas, sank two free throws with no time left on the clock to give the Seahawks a 68-66 upset victory over top-ranked Cerritos last Saturday night.

It was inevitable that the good thing the basketball team had going would come to an end sooner or later, but at the same time, it was inequitable that the consummation of their six-game winning streak was prompted by apparently inconsistent officiating.

In explaining the loss, Falcon head coach Bob Foerster could think of only one significant element: free throws. "They shot 31 free throws, we shot nine. That's a clear inequity."

Cerritos outscored Harbor by 16 points from the floor but since the Seahawks strode to the foul line more frequently than the Falcons, the game's final outcome began to take shape.

The clincher came in the final four minutes of the contest, which was knotted at 66-66 as Cerritos went into a deliberate offense. After two turnovers, Harbor also slowed down the game until Cerritos maintained possession with 1:30 left and the score still deadlocked at 66. Working for the final shot, sophomore guard Lorenzo Romar dribbled freely in the backcourt until he feared a five-second call. He penetrated to the Harbor five-second mark on the floor to restart the five-second count and then dribbled out of the Harbor defense. The whistle blew, however, and Romar was still called for the five-second backcourt violation.

"The films may show a different story," said Foerster, "but that was a designed play. Romar stepped over the line and then came back."

The turnover occurred with 21 seconds left on the clock and Harbor worked for the last shot. Thomas, the Seahawks' most prolific

shooter that night with 26 points, drove the lane and sophomore guard Brian Lumsden came down on Thomas as the final buzzer sounded.

The official's whistle sounded once more with no time remaining on the game clock, and Thomas was awarded a one-plus-one despite the argument from Foerster and assistant coach Jack Bogdanovich. Thomas hit both free throws and Harbor won the game.

"If there was time left for Harbor to shoot the free shots then we should have been given the ball out of bounds after he made the shots," said Bogdanovich.

Foerster's initial reaction to the loss was that of pure frustration. "I don't like games that are decided by the officiating. It leaves a bad taste in your mouth."

Falcon center Aristotle Myers' reaction in regards to the referees' performance was less guarded than his coach's, however.

"The officiating was terrible," Myers said after the game, "and one ref in particular did not know what he was doing out there on the courts."

But, he did not blame the referees entirely for their loss, rather, he gave some to his own team. "We didn't take care of the ball very well in the first half," he said, "and in the end we were just trying to shoot with them."

Taking the game in stride, Romar said of Harbor: "They played the best they could and we didn't play our game. They outplayed us and got a few good breaks."

The loss obviously interrupted the Falcons' six-game win streak, over the likes of defending state champs Cypress and third-ranked Pasadena, but it could be a blessing in disguise: It may have been the best preparation the basketball squad could have received for the oldest and most prestigious community college basketball tournament in California this weekend (Dec. 14-17).

With Cerritos scheduled to open its competition in the 40th Annual Modesto Junior College Classic tonight against the Blue Devils of Merced College, the loss last weekend may have wrestled away a psychological advantage from their opponents. In effect, they will no longer be the team to beat in the tournament. Had they defeated Harbor, the Falcons

## Matmen absorb first defeat, fall to Griffis

Coach Simonek remains optimistic about upcoming wrestling competition

By STEVE EAMES  
TM Sports Editor

Although his highly-ranked wrestling squad suffered its first major setback of the year last Friday at Grossmont, head coach Hal Simonek remains optimistic about his team's prospects for this week's competition.

In their 1977 South Coast Conference season opener, the Falcons succumbed to the state's ninth-ranked Griffis, 27-23, in El Cajon. Cerritos will continue league action tonight at Fullerton College and then compete in the prestigious Palomar Tournament this weekend.

"I think we'll do an outstanding job against the (Fullerton College) Hornets," said Simonek. "They won't be too much of a problem for us since they haven't been doing well so far this year."

At the Palomar Tournament, which gets under way Friday and concludes Saturday, the Falcons will find themselves among a field of 16 strong teams from California and Arizona including top-ranked Palomar College and the defending state champs, El Camino College,

who Cerritos upset, 22-20, earlier last month.

"This tournament should give us a chance to walk away with a lot of individual victories as well as a good team showing," Simonek said before predicting that the Falcons will finish within the top two berths of what he describes as a "fun" tournament.

In analysis of Friday's dual meet defeat, Simonek spotlighted recent injuries to two key players, 167-pound Rick Maciel and 142-pound Bob Legaspi, which forced him to drastically adjust his starting lineup and ultimately resulted in their poor showing against Grossmont.

"We were hoping to win this match," said Simonek, "and if we would've had our full compliment of starting wrestlers, we would have done so easily."

After the first five bouts, the Falcons maintained a sizable, 20-4 lead as Dave Suarez (Artesia High), Alvin Morita (Cerritos), Ed Delgado (Cerritos) and Cheyenne Figueroa (Artesia) each pulled victories off the mat. But as the meet moved into the mid to heavy weights, Cerritos found itself in a very precarious position.

Rene Sylva (Artesia), who normally wrestles in the 150-pound division, replaced Maciel in the 167-lb. battle but was pinned by a much tougher opponent, Eric Gritz, one-minute thirty-five seconds into the nine-minute match.

Likewise, Mike Miller (Bellflower) lost to Grossmont's Ron Obard in a major-superior decision, 20-6. Miller usually wrestles in the 158-lb. class.

Stemming the Grossmont tide was Mike Couch (Lakewood) who took down Cerritos' final points with a 7-3 decision over Mike Mahaffey in the 177-pound match.

At this stage, the Falcons still held a somewhat comfortable, 23-15, lead over the Griffis and John Ehli (Cerritos) was winning his 190-lb. bout with Cam Herrick.

However, Ehli's luck, and also his team's, took a turn for the worse as he was caught in a bad position and then pinned at 7:22 by Herrick, who is ranked No. 1 in his division in the state.

"This (Ehli's fall) really threw the team off," said coach Simonek. "A victory in this match would've given us the meet."

Protecting a then slim, 23-21, lead, the Falcon's heavy-weight contender, Gregg Tate (Downey) lost by a fall, also, in the final match of the meet—giving Grossmont an upset victory over third-ranked Cerritos.

Simonek explained that if Tate, who had just recently joined the team after finishing his season with Cerritos' football team, had been in better shape, the outcome of the meet would have been in their favor.

"Gregg will probably be one of the team's better inspirations once his physical condition is improved," Simonek said. "I'm looking for him to be one of the top heavyweights in the state this year."

"They (Grossmont) did not have a better team than ours," Simonek said summing up the match. "There's no doubt in my mind that we outwrestled them throughout the meet."

### 1977-78 BASKETBALL SCHEDULE

Date	Opponent	Place

TALON MARKS

Wednesday, Dec. 14, 1977 Page 4

**M** closed for the Holidays!

...and unaccounted for

An editorial in last week's Talon Marks ever-so-gently chided the Board of Trustees for that body's silence during conduct that was said "interpreted by one who has already made up his mind."

The situation involved a rather heated discussion and exchange between the Board and a

faculty member during floor communications. It should have been noted that President Lou Banas was not present for that meeting, due to sickness.

Knowing Mr. Banas, had he indeed been there, Trustee Merl Doty would not have been alone in voicing some small concern over the Board's seeming attitude.

## Letters to the Editor

EDITOR:

The newspaper is notorious for taking something a person says and by extracting a few key words, changing the meaning of what was actually said. I am not denying what was said, but I think I should clarify my meaning.

In the Senate we try to show all sides of the coin before voting on any issue. If this was not done, all bills would pass unopposed. I feel it is my job as a Senator to bring up these things that normally would not be mentioned in order to create a better overall view. My personal feelings in this matter were set aside.

If Zack Taylor would have looked at my voting record on the free speech podium, he would have seen that I voted "Yes". This is not the vote of a person who is against freedom of speech, but a senator who is doing his job.

Sincerely,  
Senator Sam Patti

EDITOR:

The monthly insert in the Talon Marks is really a pretty good idea. I am, however, disappointed that it is not being used or managed properly.

As I understand it the insert CampusScene is basically set up to allow Cerritos College organizations to publicize their activities. In the past a number of organizations have had to be coaxed and constantly reminded to submit pertinent information before the deadline date.

Now I come to case in point. Weeks prior to the CampusScene deadline, my fraternity submitted several news releases to be published in the Dec. 7 issue. But when the paper came out, I was quite surprised to see nothing even mentioned in the insert about the activities,

although a few organizations had several articles in. At this time, let me remind you that over one and three-quarters of that particular CampusScene issue were pictures.

Editor, you tell me, does something seem inconsistent or am I imagining things?

Jose Hernandez  
Sigma Phi Fraternity

**EDITOR'S NOTE:** CampusScene is a magazine type insert published solely for the "clubs and organizations" on campus. All copy is submitted to — cleared, approved, priority rated by — Norm Price, Co-ordinator of Student Activities.

The Talon Marks staff puts all copy into the publication that is submitted to Editor-in-Chief Martieal Willer, or CampusScene editor Sue Paulino. Make that ALL copy.

Any space that's left over, we have to fill from copy that we have to dig up — so the CampusScene will not be published one-fourth to one-third blank.

Because of the hassle and headaches inherent in trying to keep often highly vocal types as happy and as appeased as possible, Talon Marks will not mess around with the politics and pacifying of — much like the subject(s) at hand.

See Mr. Price. And be assured that nothing is left out on this end when that end keeps its end up.

It's not worth the mickey mousing around. Not for us, anyway.

(And incidentally, the Jan. 10 date given for last issue's Co-Rec Night was the precise date given in the already-typed-up story direct from Price's office.)

## Instructor Nuttall 'lends an ear' to her students

English Prof. Ann Nuttall

—TM Photo by MIKE JAMES

By MARGUERITE KOSTER  
Associate Campus Editor

When you talk to English teacher Ann Nuttall, it's like talking to your favorite aunt — always a bright smile and an open ear for listening.

"I like the students — talking to them," she says. "I know what they're going through. It's not an easy career at all."

Mrs. Nuttall can understand what the students are facing—she's been there. "I went to a junior college at night, every night of the week," she says, when recalling her school days. After junior college she went to Cal State-L.A. for her B.A., and on to Cal State-Fullerton for a Master's degree.

She has taught at Cerritos since 1968, and teaches several English classes in addition to court reporting, vocabulary and spelling.

"I get good exercise every Monday, Wednesday and Friday," Nuttall says. "I climb way to the top of the social science building. I expect by Christmas I'll be able to bounce up and down those stairs like Jack LaLanne!"

Mrs. Nuttall lives in Pico Rivera with her husband, Kenneth. She likes "just about everything. I like to sew, paint — I love to swim. I'm a good spectator."

She once taught an Adult Education class at Fullerton called "Shakespeare for Housewives," which was held at a swim club. "After Shakespeare, we'd go swimming!"

When asked how she feels about the decline in enrollment in literature classes, she replies, "I think it's a crime. Students don't realize how much they need a background of literature. If you read a good classic, you remember it all your life — like having old friends you never forget."

At one time she wanted to be a journalist, but states, "The respectable job not too many years ago for women was teaching or secretarial work. Journalism was more for men."

Mrs. Nuttall feels that "There's always something to write about and be successful if they (students) want to do the hard work that goes with it. A really good education takes work."

Her plans for the future are to continue teaching, and she would "like to travel to England or Scotland to visit relatives and see the country."

That "really good education" makes her a real asset to the Cerritos College English department.

## Potmakers spin handsome handmade ceramic pieces

By MARGUERITE KOSTER  
Assoc. Campus Editor

A lot of ceramic pots are being "thrown" by students in the Arts and Crafts building these days. Not at each other, mind you, but into handmade ceramic pieces.

Ceramics is only one of the many classes offered by the Art department, and "throw" is the term used to describe the process of molding a piece of clay on a wheel into a cylindrical form.

"We have one of the finer Art departments," says Chairman Bill Fenner. "We really cater to everybody — we keep the standards high," he added.

Art classes are taught at scheduled intervals throughout the day and include such topics as Art History, Life Drawing, Painting and Composition, Ceramics, Graphic Design, Jewelry, General Crafts and Calligraphy, which is the art of beautiful writing.

Students enroll in the courses at the beginning level (generally for prerequisite status), and advance to the intermediate stage after learning the basic skills. An Associate in Arts degree is offered, along with a two-year curriculum for transfer to a four-year college.

Classes are designed to "teach basic art education," according to Fenner. "We give students a good solid background; they need the tools of the trade to start with," he added.

In most courses students work at their own pace and have the use of on-campus facilities,

such as a large ceramic room equipped with potter's wheels which are used to create the ceramic pieces.

In addition, a firing facility is located adjacent to the classroom to produce the final potted masterpieces. Advanced students are given the opportunity to mix their own chemicals, a process in which the student must have instruction.

The Life Drawing classes hire professional models, and Fenner commented that they have "one that's over 70 named Cleo who's been a life model for professional artists since she was 14." Models range in size from very thin to "up to 300 lbs.," according to Fenner.

"Life drawing," Fenner said, "is one of the most difficult things to do. You really are working constantly. You have to do it in a certain amount of time before the model moves."

An art gallery is located in the Arts and Crafts building. The work of three local watercolor artists will be featured for three weeks.

Richard Lopez, a teacher at Rio Hondo College; Ray Bingham, a Long Beach resident and Michiel Daniels, an instructor at Long Beach City College will display their paintings beginning Tuesday, Jan. 3.

As a new addition to the spring semester program, the Art department will be offering a class in ceramic sculpture.

A complete printmaking facility which utilizes various devices to make multiples of drawings is also foreseen by Fenner.

## Job postings

JOB #	TITLE	RATE

## Speed reading is more than meets the eye

A speed reading class offers students more than just a greater number of words read at a faster rate of speed.

A variety of hand movements are used and each type serves a definite purpose. The eyes are trained to follow the hand as it moves across a page.

The lazy S, used for previewing material, allows the hand to quickly trace a huge S over the entire page.

The small X, a series of rolling crossovers down the page, allows for close scanning.

The basic hand movement, the more familiar movement, uses the index finger to follow each sentence horizontally across the

page. This movement allows for maximum exposure and retention.

Comprehension is measured by testing for retention of material content. According to a spokesman, most students learn that they can trust their first response to a question even if they felt it was a guess at the time.

Proving that the eye sees more than a person thinks it does, a process called "Pyramid Practice" is used whereby a remembered key word or phrase is recommended. Each word leads to another sometimes gathering a chain diagram that covers pages.

Speed reading rate and comprehension for each student is judged separately. One never

competes against other students, only themselves. The speed drills and comprehension tests are designed to be personal progress gauges.

Most students feel that the bonus of the speed reading course comes in the section where they are taught how to study for a test or examination.

According to instructor Francine DeFrance, speed reading can be applied anywhere, to any type of reading however, she usually cautions her classes that speed reading is a skill and like any other skill must be diligently practiced to keep it functional—for the eye tends to get lazy.

## Board sheds its light on campus

Need campus information? Find help fast on the new bulletin board located just outside the Elbow Room.

The bulletin board is approximately six feet high and 12 feet long. It has glass-front doors and will be lighted.

Information about academic programs and student activities will be posted on it.

The project was proposed to last year's executive cabinet and student senate. Both groups agreed that it would be a great convenience to students, with a major emphasis on those that attend evening classes.

"I think it's ideal for communication with students that normally stay in that area, especially night students," stated ASCC President Don Collins.

Approval from the administration passed the proposal.

According to Collins, Community Services paid half of the \$6,000 construction costs, with money from student body fees making up the difference.

Western Wood Toys began construction on the project during the second week of the semester.

**SNAPPY BALLET OPENS**—Burnight will be the scene of Christmas festivities when "The Nutcracker Suite Ballet" opens Saturday, Dec. 17, at 11 a.m. and 2 p.m. and Sunday, Dec. 18 at 2:30 p.m. During this holiday treat

for the entire family, a tree grows, snow falls, toy soldiers come to life, and Santa Claus makes an appearance after each performance. Pictured are Charles Colgan as Mother Ginger and Gingersnaps Kelly Kneubuhl and Kathy Jo Kahn.

CERRITOS COLLEGE

## Talon Marks

Production and printing of Talon Marks is funded by the Associated Students of Cerritos College. Facilities and supervision are provided by the College. It is produced by students enrolled in the academic journalism program.
